Re: ***School Bus Safety Awareness***

Dear Parents:

Transporting students safely is always the most important issue to those of us in school bus transportation. We believe that knowing what to do in the case of an emergency is critical to the students' safety. Just as students practice fire drills in the school buildings, the students should also practice evacuation drills on our school buses.

This is important knowledge that every school bus rider should have in case of an emergency.

With the consent of the principal and the assistance of staff, your driver will be conducting emergency evacuation drills on school property on **Thursday morning, October 24, 2024**. Of course, we will take every precaution to ensure your child's safety.

Thank you in advance for allowing your child to participate in our school bus safety education drills. We appreciate your continued support of our transportation program. If you have any questions concerning this process, please contact the Customer Service Center at 248-203-3940.

Sincerely,

Sharlene Douglas
