

University of Toronto BODY SUBSTANCE EXPOSURE

Exposed Student/Person Kit Instructions for Mount Sinai ED

The following are instructions are to be provided to the ED staff.

1. **A Post-exposure consent** is included in the Exposure package presented by the student/person. Please ensure the consent is signed and then placed in the person's medical record. This is proof that informed consent was obtained and so should remain in the person's medical record.

2. **Order test** as per consent form
 - ALT - Liver function Test
 - Hepatitis B surface Antigen
 - Hepatitis B surface antibody
 - Hepatitis C antibody
 - HIV antibody/antigen combo

3. **Microbial Immunology Requisition & Chemistry:**
Complete requisitions using an address-o-graph label.

4. Draw **three red or gold top tubes** of blood (not included in kit), labelled with Laboratory test labels.
 - a. One tube with ALT test label with chemistry requisition to be forwarded to the Core lab.
 - b. Label one tube with hepatitis serology and one tube with HIV test labels, with microbial immunology requisition to be forwarded to Microbiology.
