

Study Point Exercise 2 - JavaScript, DOM and AJAX

You can earn a maximum of **5** points for these exercises as outlined below:

- 1 point if you have completed most of the exercises from Javascript Day-1
 - [The JavaScript Array](#)
 - [Day-1+2 JS](#)
- 1 point if you have completed most of the exercises from: [Javascript Day-2+3](#)
- 1 point if you have completed most of the exercises from [Day 4 - Ajax](#)
- 1 point for the Exam Preparation Exercise: [JavaScript, DOM, AJAX and SVG](#)
- 1 point for the Exam Preparation Exercise: [JavaScript, DOM, JSON, AJAX and JPA](#)

If you hand in via mail you can get the additional "attendance point" if your score is **three** or above and you have started on the two Exam Preparation Exercises. If not, you should probably have attended the class to get help ;-)

When to hand in

If you hand in via mail send a mail as described below no later than **Friday, September 1st 16.00**

If you attend the class, you can demo your solution up until **15.45**

These deadlines are hard.

How to hand in:

Either demonstrate what you did in the class, or send a mail to iwantstudypoints@gmail.com including the following:

IMPORTANT: If you hand in by mail, without following the instructions below, you only get one point for the hand-in.

Subject: Study Point Exercise-2

Content:

- First line must be your **full name + class (COS or DAT)**,
- Next line: the link to your Git-hub repository for ex-1
- Next line: the link to your Git-hub repository for ex-2
- Next line: the link to your Git-hub repository for ex-3
- Next line: the link to your Git-hub repository for ex-4
- Next line: the link to your Git-hub repository for ex-5

If you have one repository for all five tasks, each line above must explain where to locate code for each sp-task in your repository. We have to check almost seventy hand-ins, so we don't search for topics not referred to above.
