

There have been new developments in Ryder Millet's infidelity scandal!

It turns out that the woman that Ryder Millet cheated with was Hope Lockhart, daughter of none other than the late Miranda Lockhart, the lead singer of the hit band, My Darkest Knight, who became a hit sensation twenty years ago. They topped the charts until they abruptly split up. Allegedly, they dropped off Lockhart in a tiny town on the way to a concert in New Orleans. She was known to sleep around and her diva behavior. A legal battle ensued because she technically dropped them to allegedly "teach

them a lesson". The legalities left her without a penny to her name. She was reported dead by suicide by Hope herself via tweet.

No actual death certificate has been reported nor was a body found. Accusations pointed to Carter King, Randi's long-time boyfriend at the time but no foul play has been found.

This tragic end to such budding talent is a cautionary tale for any rising artist. Now years later, her daughter has stirred up controversy the same way her mother did. Millet has his own dark past. His father, Ellis Millet, has a notorious rap sheet that stretches back before Ryder was born. His charges include aggravated assault, and three counts of murder. He spent years in and out of prison and psych wards as a result of his crimes, citing overcrowding as the reason for him currently walking free.

Now their kin seem to be drawn to each other like moths to a flame. Or was it? It is also possible that Millet and Hope concocted this scandal for publicity. Are these two chaotic forces destined for a doomed future? What of Ryder's significant other, Alice? Not much information would be found of her in the database. What is her part in this dynamic? Will her relationship with Millet last or will it burn out? Only time will tell!
