

AD HOC COALITION OF FILIPINO CREATIVES TO SAVE THE JEEPNEY

Petition & Solidarity Statement

"A just transition to jeepney modernization entails putting critical infrastructure in place and empowering small cooperatives while developing renewable energy sources."

Mavic Conde

Jeepneys' just energy transition bogged down by lack of support

"The protection of the environment through clean energy and providing the riding public a better transport system must not come at the expense of making a significant part of the labor force irrelevant and voiceless in the transition process."

Gina R. Gatarin

Modernising the 'King of the Road': Pathways for Just Transitions for the Filipino Jeepney

"Mobility justice recognizes that communities are often treated as if they are unfit to design their own futures, guide public spending, or understand the 'real' issues at hand. Mobility justice demands the creation of new decision-making systems and structures by and for these communities."

Mimi Sheller

Mobility Justice: The Politics of Movement in an Age of Extremes

Dear President Marcos Jr.:

We are now on the verge of the December 31, 2023, deadline for the removal of unconsolidated franchises of Public Utility Jeepneys (PUJs) and Utility Vehicle (UV) Express units as part of the now six-year-old Public Utility Vehicle Modernization Program (PUVMP).

Yet despite years of anticipation of this moment, the PUVMP fell far short of both the government's and the peoples' hopes. It missed the chance to formulate effective solutions via the lack of ample consultation of both industry experts and affected parties. Ideally, the PUVMP's aspirations should be achieved via a grassroots-led transition that is just and equitable, grounded on infrastructure and systems that are co-developed with impacted communities. Yes, we need to respond to the global climate crisis, but any solutions to the climate problem should also be multi-sectoral and holistic, where everyone - especially the most vulnerable populations - is engaged and consulted.

We, Filipino Creatives, express our unconditional solidarity with transport groups, operators, commuters, and all advocates of mobility and climate justice in the nationwide call for the Executive Department to reconsider the December 31 deadline for Franchise Consolidation and to reassess the PUVMP in collaboration with jeepney and UV Express drivers and operators. Rushing the implementation of the program in its current state without proper preparation will heavily impact the fate of numerous drivers, operators, and their families, as well as that of the countless commuters the industry serves. And, as the highest elected official of the country, their welfare rests upon your decision at this critical juncture.

We therefore implore that, as the highest elected official of the country, your office must issue an Executive Order to revoke the December 31 deadline for Franchise Consolidation of jeepneys, and give further time and support for jeepney drivers and operators to be able to comply.

In 2017, the government initiated the PUVMP through the issuance of Department Order No. 2017-11 by the Department of Transportation (DOTr), commonly known as the Omnibus Guidelines on the Planning and Identification of Public Road Transportation Services and Franchise Issuance, or the Omnibus Franchising Guidelines (OFG). The modernization program aims to:

- 1) Address the environmental impact stemming from the pollution generated by traditional PUVs;
- 2) Enhance the commuting experience by offering a more comfortable and dignified mode of transportation; and,
- 3) Elevate the livelihood and well-being of transportation workers.

The program, however, has significant shortcomings:

The PUVMP falls short as a genuine solution to the climate crisis. While we recognize that the PUVMP has good intentions with respect to environmental protection, particularly in addressing the problem of urban air pollution and carbon emissions due to the burning of petrol, it misses the mark on the actual impact of the public transport sector to the environment - PUVs makeup only 2% of the total vehicle volume in the country, while privately-owned vehicles constitute the remaining 98%. Addressing pollution requires a comprehensive approach that includes revisiting car-centric policies and infrastructure. We even dare to argue that promoting the development of the public transport sector will ultimately be more beneficial to the environment, as private vehicle owners will no longer need to use their cars just to be able to arrive at their destinations on time.

The program forces transport workers into deep debt. Jeepney operators participating in the PUVMP must not only retire their traditional gas-fed vehicles, but also must acquire new modernized jeepneys, each costing between P2.5 to P5.0 million, so that they can continue to be of honest service to the Filipino commuter. Additionally, they are going to be burdened with the need to form cooperatives/corporations, procure their own terminals and motor pools, and account for other associated costs of complying with modernization. Without an effective and equitable loan program for the underprivileged operators, the PUVMP will push ordinary transport workers into further debt - facilitating takeover of the system by large corporations and individuals geared not at providing genuine public service but at profiting from the situation. Since 2017, only 9,813 units of modernized jeeps have been deployed, a mere 3.27% of the 300,000 jeepneys nationwide pre-pandemic.

The weight of the PUVMP's modernization expenses falls disproportionately on the shoulders of commuters. The substantial financial investment required from jeepney drivers and operators is likely to result in fare hikes, estimated at a minimum of P40.00 to P50.00, adjusted for current inflation, to recoup their expenses. Such large increases in expenditures will directly affect the ordinary commuter, but in the long term, it can also affect the prices of local commodities that are reliant on public transportation for logistics.

Echoing Makò Micro-Press: “How can we reclaim and revalue the narratives of progress, growth and development with climate, labor and mobility justice as their foundations?”

As the highest elected official, we implore you to issue an Executive Order rescinding the Franchise Consolidation deadline for jeepneys. The livelihoods of drivers, operators, and their families hinge on this decision, necessitating a collaborative reassessment of the PUVMP to ensure an equitable, community-led transition and address the pressing needs of our most vulnerable citizens.

With care and burning passion,

Ad Hoc Coalition of Filipino Creatives to Save The Jeepney

My name is Bart Francis R. Potestad, and I don't want to phase out the jeepnys cause many jeepney driver will be affected ad their families will be affected too because they can't afford a modern jeep to replace their old jeepneys. That's why I dont want to phase out the jeepneys.

hayle nathalie basadre di ako sumasangaayon na mawawala ang jeep dahil paano na ang mga studyante at mga magtatrabaho, lalong hihirap ang buhay kapag walang jeep, dahil kung tutuosin ang jeep ang ating kabuhayan. at hindi nila pwede e alis ang jeep dahil tayo ang gumawa neto, lalong mahihirapan ang mga tao pag inalis ang jeep. maraming mawawalan ng kabuhayan.

I am Frecean Joy Deri, A student who like to sign and stand in Solidarity to save the jeepney. As a Filipino citizen and a comuter I cannot let the removal of of unconsolidated franchises of Public Utility Jeepney's (PUJ's) and Utility Vehicles (UV) express units be approved. Jeepney's has always been a part of our culture and removing it for me feels like removing a big part of my identity and nationality. We should keep and introduce our beautiful culture to the whole world and pass this culture to the

future generations, never let this beautiful culture of ours fade and forgotten. This doesn't only concern me about our culture but mostly the jeepney drivers and workers who only depends on their Jeepney's as their job and livelihood that would help them to be able to sustain their families needs and be able to survive in their everyday lives. They are the people who keeps the culture we have. I cannot stand seeing them losing their job's that became their only source of income and life, instead of phasing them out why can't we just help them improve their Jeepney's for a better transportation experience without phasing out our culture.

no hahahaha, I fully support the modernization of jeepneys kasi nga sino ba yung kinakawawa ng mga mayari ng jeep? diba yung mga drivers nila? inaabusa nila yung mga drivers para tuloy tuloy ang pasada, maraming jeepney drivers ang nakakaranas ng heatstroke dahil dito. at di hamak na mas malamig ang modern jeepneys, however I do not fully support the jeepney phase-out kasi marami pa namang jeep ang maayos at maganda pa. dapat ang i phase-out nila is yung mga jeeps na kakarag karag na o yung mga konti nalang ay bibigay na, let me give you an example to that one jeepney going to san gabriel to tanqui, gray and green in colour like masisira na siya konti nalang talaga. yung mag turn siya ng left as in maririnig mo talaga yung halakhak ng demonyo. YES TO JEEPNEY MODERNIZATION AND YES NA YES TO PARTIAL JEEPNEY PHASE-OUT! I WON'T DEFEND THE JEEPNEYS THAT GIVES RISKS TO ITS PASSENGERS! that's all!
