

# “Complicated” SQL Practice

```
CREATE TABLE Class (  
    dept    VARCHAR(50),  
    number  INT,  
    title   VARCHAR(50),  
    PRIMARY KEY (dept, number));  
  
CREATE TABLE Instructor (  
    username  VARCHAR(50) PRIMARY KEY,  
    fname     VARCHAR(50),  
    lname     VARCHAR(50),  
    started_on CHAR(10));  
  
CREATE TABLE Teaches(  
    username  VARCHAR(50) REFERENCES Instructor,  
    dept      VARCHAR(50),  
    number    INT,  
  
    PRIMARY KEY (username, dept, number),  
    FOREIGN KEY (dept, number) REFERENCES Class);
```

1. How many classes are being taught by at least one instructor?
2. Which instructors teach more than 1 class? Give the username, first name, and last name of these instructors. Do NOT use a correlated subquery (although that is a good place to start).
3. Which CSE courses do neither Dr. Levy (username 'levy') nor Dr. Wetherall (username 'djw') teach? Give the department, number, and title of these courses.
