April 21, 2016

Dear Chittenden East School District Community Members,

Our school district is committed to the health and well being of all our children. This includes surrounding children with resources, recreation and services. This means everything from local skiing, a bike path, a community garden, robust farm-to school in each building or a nurse practitioner and pediatrician in the community all committed to quality mental and physical health.

As a member of the community we all have different roles. We want to pull the community members from various groups together three times a year to advise our school based team in our work. We want your input and advice. Whole School, Whole Community, Whole Child (WSCC) refers to a wrap-around model developed through extensive research on programs that make a difference for children. Our thrice per year meetings “WSCC Community Team Meetings” include a goal for everyone to share expertise, provide suggestions for lateral support and feedback on what works and consider growing, reinforcing or new directions for programs. We hope you can join us. If you are unable please feel free to send along an email with ideas or pass the information to others.

Attached please find an announcement and on the reverse side an agenda. We look forward to your ideas. Please feel free to contact me if you have any questions.

Sincerely,

Jennifer Botzjorns
Assistant Superintendent.
