Time Capsule Club: Help create a Bigelow Digital Time Capsule documenting student experiences during the 2020 Pandemic School Closure. A time capsule is a collection of items and/or information that provide future generations with a brief window into life as it was experienced by those in the past. Let's tell future Bigelow students what life was like for students during this unique moment in time.

Club participants will :

- explore and discuss what makes a captivating time capsule (pre-digital and digital)
- create an individual digital document of their current experience during the 2020 Pandemic (sharing a piece of writing, drawing/painting, music, photographs, an explanation of how one spends time, and how one is feeling)
- share and view each other's digital documents
- help create and organize Bigelow's final digital time capsule

Cooking Club with Nurse Schy: Let's cook together. We will make recipes of your choice either for a family treat, dinner that night, or possibly decide to donate what we each make to those in need. Whatever the ingredients are we need, hopefully, you can add them to your family's shopping list for the week.

Collage Art & Design Club: Make collage art and/or share your personal design interests from home! The only materials you need are paper, glue, and a device (computer, tablet or phone).

There are different ways to participate - create your own works, share images you find online that you like, and/or comment in the discussion.

Once a week we'll meet on Zoom to view our creations, share our design interests, listen to music, and visit!

Chess Club: During Chess Club you will play chess with your peers, watch the masters play, take online lessons and grow your skills in chess.

Art Club: Skill tutorials, Art projects, Art project critiques, Look at artists, Discuss art and artists

Anime Club: Come hang out and watch anime with fellow students. We'll be picking up with Season 2 of K-On

Student Council: Continuing work on existing initiatives (Bigelow Clothing Sale) and planning remote learning student activities like Spirit Days and other school-wide activities to promote student connectedness to school.

Home Economics Club - are you interested in Cooking, small-item repair, proper use of tools, cleaning, up-cycling and sewing. Come join us to learn how to help around the house!
