

Tag/title command is a plugin where players use and equip chat tags/titles. Tags can be given to players when they apply the note by right clicking it and then they can select it in the gui.

Video showcase:

<https://youtu.be/pE5RmmvkBoY>

Features:

- Placeholder for title/tag that can be used in essentials chat and in animated names
- Tags/titles item is paper <https://imgur.com/a/eEgCULG> Tag could be colored as exactly what the titles color is. If in the display it's orange in there it should be orange too. Same in the gui
- tags people don't own shouldn't be displayed.
- in the spaces were there aren't tags don't have anything
- config file to add in tags
- tag gui
- tags in the tag gui should have the display name and color in them
- Can view others peoples tags and see which one they have equipped
- tags in tag gui should be all black stained glass if unequipped and green if equipped and have this to equip <https://imgur.com/a/Cp3RHrp> and this unequip <https://imgur.com/a/xT79tCE>
- Titles fill up in a gui <https://imgur.com/a/bwfGwkq> They fill up row by row. Once there are 5 rows of titles the 6th row should be dedicated to go next page in the 9th slot of the 6th row and in the first slot of the six slot on the next page go back.
- configurable sound and particles once you unlock tags
- Can equip and unequip tags
- All admin commands should have title alias.
- All messages, Item names/ids/, and item information configurable
- Admin help should be displayed if someone mistypes something after /tagadmin

DIFFERENT FEATURE THAN WHAT DISPLAYED:

Player Commands (Anyone can use):

- /tag - opens their own tags gui
- /tags - opens their own tags gui
- /title - opens their own tags gui
- /titles - opens their own tags gui
- /tags <player> - view someone's elses gui of tags
- /tag <player> - view someone's elses gui of tags
- /title <player> - view someone's elses gui of tags
- /titles <player> - view someone's elses gui of tags

Admin commands (tags.admin): (ALL TAG Admin commands should have the aliases above. ie titleadmin or tagsadmin)

- /tagadmin give <player> <name of tag> - gives player tag note
- /tagadmin remove <player> <name of tag> - removes players tag
