

SL: The one man agency model

SL: This secret Agency model is making millions

SL: Meta ads are dead in the AI era

PV: Here's a better way to generate leads

Hey %Firstname%

A few years ago,

I was well known for generating leads for businesses using paid traffic

I built a good business around it, was making good amount of money

But as the time passed

It became harder and harder to gain profits

Because meta ad costs sky rocketed. Algorithms shifted. COVID made everything worse

I was burning money, stressed out

I barely saw my family

And when I did see them

My mind was busy, my eyes were glazed over

On top of that

My clients would complain that the leads I've generated for them were terrible

That's when I realised:

Working harder and longer wasn't fixing anything

So, I went in search of a better way

I tested everything - new funnels, ad strategies, software hacks

Most of them failed. Some of them wiped out tens of thousands of dollars overnight

And after 18 months of trial and error(and nearly half a million dollars spent)..I finally cracked it

THE INSTANT AI AGENCY

This agency model made me land multi million dollar business owners as clients

Also helped me scale to 7 fig all while working few hours a day

here's why I bet on this model:

✅ **One man agency** - You're the only human in the agency. AI + SMS handle all the heavy lifting

✅ **Highly profitable** - You can keep almost 50% of the profit margins

✅ **Minimal time** - All it takes is a few hours a day

I always wanted to teach agency owners about my agency model

I've put everything I learned into a simple **Instant AI agency ebook** so you can shortcut the trial and error
