Student Club Descriptions 2022-2023

Club Zif w/ Mr. David Cook - This is a club where we get together and draw cartoons and learn to perfect our skills, and then take pictures of our work and put it on the web. We will work on our own projects, but at times work on items that can be displayed on the walls.

The Art Club w/ Mrs. Jill Kassens - is a place for practicing artists to hone in on their skills, develop their techniques and portfolios, collaborate with other artists like themselves, create bonds with the community through the arts, and learn how to work together through group projects that will beautify the school and community.

German Club w/ Mrs. Catherine McCormick - We will learn basic German language skills by reading children's books and practicing with each other. We will learn about German culture and do individual projects.

SOAR (Students Observing, Advocating, and Responding) w/ Mrs. Jamie Hicks - Ever want to do more? This club will focus on service and volunteering as well as school betterment. Projects will involve volunteering opportunities and working to make our school creative and unique throughout the building. Students will work and lead projects that they feel are important and benefit all students.

Mentoring Club w/ Mr. Brent Cook - We will pair older students with younger students. Older students will help mentor the younger students with their school work and be a positive example for them.
