

Activity Report – ECOSYSTEM VLG WORLD

Period : From inception to the present day

Author : Virginie Guignard Legros

[Français](#) - [English](#)

1. Introduction

ECOSYSTEM VLG world's presentation

ECOSYSTEM VLG world is an organization that combines technological innovation and humanitarian commitment. Its aim is to provide concrete, sustainable solutions to societal problems through two main focuses:

- **GOOD VLG WORLD:** dedicated to technology and innovation.
- **100 VLG WORLD:** dedicated to humanitarian, climate and social causes.

The organization is founded on the values of resilience, ethics and innovation to build a better future for children through the prosperity of their families.

2. History & Genesis of the Project

The first stages (2018 - 2020)

- **March 2018:** After coordinating six sessions of the GdP-Lab of the Project Management MOOC at École Centrale de Lille, Virginie Guignard Legros and her team create an online incubator for their alumni, followed by the **COCÖÖÖN Organizations** association to support innovators.
- **July 2018:** Design of the **REED** program as part of an Xprize competition to help the poorest farming communities lift themselves out of extreme poverty.

- **December 2018:** Signed a contract with the **CJPVGCI** and **NIDE** associations in Côte d'Ivoire to research and ethically dispatch funds to a community of 470,000 people.
- **March 2019:** Organization of a major event in Daloa (Côte d'Ivoire), bringing together 2,000 people and culminating in the creation of Africa's first resilience center dedicated to peace: "A Heart for All".

Evolution and restructuring (2020 - 2024)

- **December 2020:** The organization changes its name to **REGENERATION MATRIX** in order to disassociate itself from unethical groups and prepare for a fresh start by maintaining a strictly volunteer structure.
 - **June 2021:** Launch of the **ANGELS** project, a volunteer network comprising lawyers from the International Criminal Court, civil society representatives in the DRC, Burundi, Côte d'Ivoire and Benin.
 - **February 2023:** Adoption of the **VLG WORLD** extension for all projects to clarify the origin of creations and guarantee their ethical management.
 - **January 2024:** Creation of the **VLG WORLD GOOD branch**, responsible for digital projects in the public interest.
 - **January 2025:** New administrative structure under the brand name **ECOSYSTEM VLG WORLD**, separated into two divisions: Humanitarian and Technology.
-

3. Business Clusters

A. GOOD VLG WORLD – Technologies & Innovation

- Development of digital solutions for young people.
- Security and ethical data management.
- Development of bilingual virtual reality platforms based on Minecraft video game technology.
- Preparation of skills certification programs for young people.
- Design of modular primary layer technologies to create governance platforms for large communities.
- Selection of the world's best technologies compatible with our values and systems.
- Representation of these technologies in order to promote them for international public benefit and the GOOD Label Club.

B. 100 VLG WORLD – Humanitarian Aid, Climate & Society

- Creating actions and places on the theme of preventive, crisis and post-crisis resilience.
- Creation of ANGELS Networks made up of benevolent people to create artificial social networks in areas where trust no longer exists.

- Creation of LIONS Networks made up of companies and national players wishing to participate in local developments and specific actions in certain territories.
 - Coordination of local ANGELS networks with our beneficiary organizations, or POLLENS networks with non-beneficiary organizations wishing to be coordinated with others.
 - Support for communities in crisis or with difficult-to-solve problems (DRC, Benin, Republic of Guinea, Ivory Coast, USA, Ukraine...).
 - Customized resilience programs for victims of conflicts and disasters.
 - Programs to relocate city neighborhoods to new sites following climatic and other disasters.
 - Support for young refugees via immersive platforms in areas with a good internet network.
-

4. Collaborations & Partnerships

- **Minecraft's mods Teams:** Technology support and digital education.
 - **Humanitarian NGOs and local associations:** ANGELS networks
 - **International schools & universities:** Adapted educational programs.
 - **Experts in psychology and resilience:** Support for young victims.
-

5. Impacts & Results

- Development of several education and resilience platforms.
 - Creation of a secure and ethical data management model.
 - Reunification of communities and effective field actions.
 - Consolidated partnerships with digital and humanitarian players.
 - ANGELS set up in various countries to strengthen social trust and collective action.
 - Setting up SOLIDARITY LIONS to work together on the development and well-being of territories and communities.
-

6. Future prospects & projects

- Expansion of programs in Africa, India and the West.
 - Launch of new immersive platforms (Los Angeles, Ukraine).
 - Creation of a **charitable foundation** to manage data transparently.
-
