[DOWNLOAD](#)

[Installation Guide](#)

1. Download the mod file [here](#)
2. Open this folder "C:\Program Files (x86)\Steam\steamapps\common\TY the Tasmanian Tiger"
3. Put the "Patch_PC.rkv" in the folder
4. Start the game and enjoy :)

Ty Cheats: *(Left/Right are arrow keys, not A & D | Left/Right are d-pad on controllers)*

HARDCORE DOESN'T HAVE CHEATS

Note: Some levels in hub1 may be a little weird to access, if you go to one of the standard spawn points and jump up you will hit a teleporter which takes you into a custom sky hub which is under construction with all the hub1 levels.
