

CADRE Citation Guidance

Updated: September 3, 2026

CADRE Project Support

CADRE projects supported by NIH grant funds should use the following citation:

Research reported in this publication was supported by the National Institute of General Medical Sciences of the National Institutes of Health under Award Number P20GM130414, as part of an award totaling \$XX, with X% financed from non-federal sources. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

Per OSP recommendations, current CADRE award totals will be calculated as cumulative total authorized funding.

- Phase 2 Awards (9/1/24-7/31/27) = "\$7,802,567, with 10.6%"
- Phase 1 Awards (8/1/19-8/31/24) = "\$13,305,391, with 10.4%"

**Last updated 9/14/26*

Projects Supported by Institutional Funds

Projects supported by institutional funds should not cite the grant. Instead use the following citation:

Research reported in this publication was supported by Brown University. The content is solely the responsibility of the authors.

Salary Support Only

Salary support alone is not sufficient for NIH grant acknowledgement. The grant number should only be acknowledged when grant-supported activity contributed to the research reported in the publication and the work falls within the scope of grant. NIH guidance recommends acknowledging only grants that directly supported the research described in the publication ([Communicating and Acknowledging Federal Funding](#)).

Foreign Components / Foreign Authors

IDeA awards do not permit foreign components. **If a manuscript includes a foreign co-author or a project involves research conducted at a foreign site, please contact the CADRE Program Director before acknowledging the CADRE/P20 grant as prior approval may be required.** To acknowledge CADRE support, the following conditions must be met:

- All research activities conducted at the foreign site must have been supported **entirely by non-IDeA funds**.
- No IDeA/CADRE funds or resources may have been used or exchanged in those foreign-site activities.

- No human subjects or vertebrate animal research may have been conducted at the foreign site using the IDeA-supported work.
- The foreign collaborator's contribution should be clearly documented so that we can confirm that the CADRE award did not support activities conducted outside the U.S.

NIGMS requires the PI to affirm these conditions in the **RPPR** for publications involving foreign co-authors.

Clinical Lab Core Usage

CADRE investigators whose research is supported by CADRE and the CLC should use the following citation:

Research reported in this publication was supported by the National Institute of General Medical Sciences of the National Institutes of Health under Award Number P20GM130414, as part of an award totaling \$XX, with X% financed from non-federal sources. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

**See CADRE Project Support section for current figures*

Fee-for-service CLC users should use the following acknowledgement:

The authors acknowledge the Clinical Laboratory Core of the COBRE Center for Addiction and Disease Risk Exacerbation (RRID:SCR_028680) for providing clinical research services and support.

REACH Core Usage

CADRE investigators whose research is supported by CADRE and the REACH Core should use the following citation:

Research reported in this publication was supported by the National Institute of General Medical Sciences of the National Institutes of Health under Award Number P20GM130414, as part of an award totaling \$XX, with X% financed from non-federal sources. The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health.

**See CADRE Project Support section for current figures*

Fee-for-Service REACH Core users should use the following acknowledgement:

The authors acknowledge the Recruitment, Engagement and Community Help Core of the COBRE Center for Addiction and Disease Risk Exacerbation for providing research services and support.

CADRE Contact

For any questions regarding how to cite the CADRE, please contact Rebecca Joyce, CADRE Program Director at rebecca_joyce@brown.edu.
