

Chromebook: Fix Resolution for NWEA MAPTesting

BISD Learning Team - Contributed by Michael Utterback

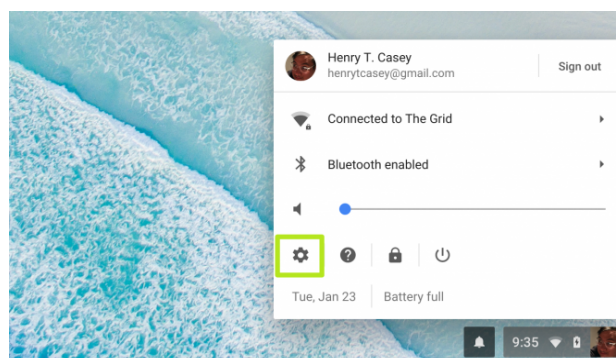

Verify Screen Resolution

If using a Loaner Chromebook, you must remove all profiles and log in as yourself for this to work.

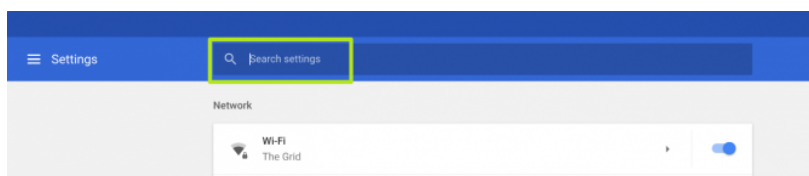

1. Click the time, Wif-Fi, power and avatar icon box in the bottom right corner.

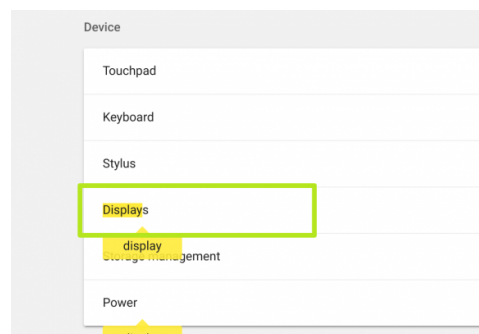

2. Select the Settings icon.

3. Type Display in the search field.

4. Click Displays.

5. Drag the slider to the left or right. Moving it to the left decreases resolution and dragging it to the right increases resolution or move slider to 100%.
