

## Overview

We are seeking a talented and experienced Blockchain Developer to join our dynamic team. As a Blockchain Developer, you will be responsible for driving the development and execution of our Decentralized Exchange (DEX) platform. The ideal candidate will possess a deep understanding of blockchain technology, strong project management skills, and a passion for building decentralized applications (dApps).

## Requirements

### Experience

- Minimum of 8 years of experience in software development.
- Minimum of 2 years of experience specifically in blockchain projects.
- Currently engaged in a blockchain project or, if the project has just ended, having worked continuously in blockchain projects for the past 6 months without any breaks.

### Technical Skills

- Very good knowledge of the following technologies:
  - Solidity
  - Web3.js
  - MERN
- Extensive knowledge of blockchain technology and smart contracts.

### Language Proficiency

- Proficiency in English at level B2+ or C1.

## Responsibilities

### Product Development

- Participate in the review of product requirements, system design, and program code.
- Provide improvement suggestions to enhance product quality and performance.

### Testing and Quality Assurance

- Design and execute test cases to track and locate defects or issues in product software, ensuring high-quality deliverables.
- Improve the existing testing plan to enhance testing quality, including but not limited to:
  - Testing process improvement
  - Testing innovation
  - The introduction of new testing methods

## **Smart Contract Implementation**

- Implement smart contracts using Solidity and decentralized protocols to ensure the integrity and efficiency of blockchain transactions.

## **Automation Solutions**

- Propose reasonable automation solutions based on the characteristics of the product and project.
- Design and implement automated testing tools to improve testing efficiency and effectiveness.

## **Benefits**

- Competitive salary and performance-based bonuses.
- Flexible working hours and remote work opportunities.
- Access to professional development resources and training programs.
- A vibrant work culture that values innovation and collaboration.

## **Role**

- Frontend Developer : ReactJS, web3.js
- Backend Developer : NodeJS, web3.js
- SmartContract Developer : Solidity, Go, Rust
