

McGraw Hill Brightspace Quick Start Guide

Assignment Sync and Grade Passback

The **McGraw Hill LTI Link: Grades and Assignment Integration** tool syncs assignments and grades between the programs hosted on the McGraw Hill Open Learning Platform and your Brightspace courses.

Start Here: Connect Your Course

Pair your Brightspace Section(s) with your Reveal Math Resources

This step is only done once.

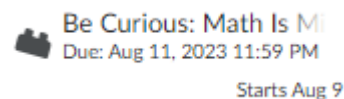

If you merged two math courses, pair both sections.

Note: Steps 1-8 must be completed to activate components that were uploaded from a Reveal Course Package or copied from a Reveal Master Course.
