

ABSTRACT TITLE INDICATES RELEVANT CONTENTS (Arial: 12pts all caps)

B. Atman¹, R. Obin², J. Oker^{3*}, H. Quinn⁴ (arial 11pts, centered)

¹Department, Institution, Address, Zipcode, City, Country. (arial 10pts, centered)

²Department, Institution, Address, Zipcode, City, Country.

³Department, Institution, Address, Zipcode, City, Country

⁴Department, Institution, Address, Zipcode, City, Country.

*presenting author, smile@whysoserious.com (arial 10pts)

Keywords: *up, to, five, key, words (arial, italics, 10 pts)*

Plain text abstract in Arial 10pts, no more than **250** words in a single paragraph. Remember to **not** include references or figures. Note proper format for taxonomic terms (e.g., italics for *Genus species*). Abstracts will be assessed for content and progress of the research. Projects with preliminary data are more likely to be selected for poster presentations, whereas projects nearing completion with definitive data and new insights will have a higher chance to be selected for oral presentations (if the authors prefer this option). It is thus important to thoroughly describe your research question, the data you collected and how it contributes to the research question. Please also refer to the Nature format abstract for clear abstract construction.

Acknowledgements: a maximum of **50** extra words are allowed for acknowledgements.
