

👉 Prompt 👈

Create a highly realistic cinematic vertical portrait, closely matching the reference image. A young South Indian woman is shown in a close-up/medium portrait, wearing a traditional red saree with a dark black/charcoal blouse, looking slightly toward the left side of the frame with a soft, innocent, emotional expression. Her face is the main focus of the image.

She has natural South Indian facial features, large expressive dark eyes, neatly shaped eyebrows, a small traditional red bindi, a delicate gold nose ring, traditional gold earrings, and layered black-beaded/gold mangalsutra-style necklaces. Her black hair is naturally parted in the center and loosely tied/back, with a few fine strands of hair illuminated by sunlight.

A man's hand gently holds her chin/cheek from the foreground, creating an intimate romantic cinematic moment. The man is partially visible only from the back/side in the foreground, wearing a dark black/green shirt. His face must remain outside the frame and out of focus. The woman's eyes are directed toward him.

Composition: vertical 9:16, woman positioned slightly right of center, close framing from approximately chest-up, man's shoulder occupying the lower-left foreground, his hand naturally touching her chin. Keep the woman's face extremely sharp and detailed while the foreground man and background have realistic depth-of-field blur.

Background: rustic old South Indian setting with an aged stone/brick wall, muted green and earthy brown tones, naturally weathered texture, softly blurred. Warm sunlight comes from behind the woman, producing beautiful golden rim lighting around her hair, subtle glowing hair strands, natural highlights and realistic shadows.

Lighting: warm late-afternoon golden-hour sunlight, strong natural backlight, soft cinematic fill on the woman's face, realistic skin highlights, gentle shadows, subtle atmospheric glow, natural HDR exposure.

Visual style: ultra-realistic Indian cinema still, emotional romantic atmosphere, authentic South Indian village aesthetic, natural skin texture, realistic eyes, detailed jewelry and saree fabric, shallow depth of field, creamy background bokeh, cinematic color grading, subtle film grain, realistic photography, 50mm lens, f/1.8, high dynamic range, 8K ultra-detailed quality.

Important: preserve natural anatomy and realistic proportions, realistic hand and fingers, realistic facial details, no excessive beauty filter, no plastic skin, no cartoon appearance, no artificial-looking eyes, no extra fingers, no distorted jewelry, no text, no watermark, no logo.
