

Awesome Kidz 2

Unit 1 Lesson 11

Aim: Students will practice counting objects accurately and recognizing numbers by circling the correct answers.

Time: 45-60 minutes

Materials:

- Real school supplies (pencils, erasers, crayons, glue sticks, pencil cases)
- Crayons or coloured pencils for circling and drawing
- Blank paper for drawing activity

Tip: Encourage students to double-check their counting by touching each object as they say the number. This reinforces one-to-one correspondence and accuracy.

Engage

Hands-On Counting Game

"Find and Count!"

Scatter real school supplies (erasers, crayons, glue sticks, pencils, and pencil cases) around the classroom.

Ask students to find a specific number of items (e.g., "Can you bring me three erasers?").

Once they gather the correct number, have them count aloud as a class.

Encourage peer collaboration by having students count together before presenting their items.

Explore & Practice:

With the book

Display the book page and point to one type of school supply at a time (e.g., crayons).

Ask: "How many crayons do you see?" Have students count together. Guide students to find the correct number in the answer choices and circle it. Model the process first by counting aloud and demonstrating how to circle. Encourage students to check with a partner before circling their answers.

Closing:

Creative Counting Art

"Draw & Count"

Provide each student with a blank sheet of paper. Ask them to draw a specific number of school supplies (e.g., two pencil cases, three erasers). Support them in writing or tracing the corresponding numbers below their drawings. Allow students to share their work and count aloud for the class.
