Enclosed you will find a daily description of the ride and associated plans

You will also find an SD card for your gps unit. This card contains all the customs ride maps which I created and it also has the Topo maps for the area. In the event of obstacles these Topo maps can be used to route yourself out of the area. You should install this sd card into your gps prior to the ride.

If you have trouble with your gps I will be happy to help you at the ride

You will also find paper daily ride maps, these are to be carried with you as a quick reference to aid you in understanding your gps and the days route.
