Wedge went down at Kile II, so the Rogues rescued him from the prison on Kessel, then battled at Taloraan, Fest, Chandrilla, Sullust, and finally had a showdown at Thyferra, With Moor being shot down and Luke Killing Seerdon. Moor would then Retire from the squadron, while the rouges rescued rebel agent Tycho Celchu from Dantooine. Finally, Sarkli, who was fed up with the way he had been neglected by the squadron, defected back to the Empire at Ralltiir.

The Road to Hoth (2ABY-3ABY)

Active:

Renegade Flight -----

- ℞ **Red / Renegade Leader** ----- Commander Arhul Narra (Human, Male)

- ℞ **Red Ten / Rogue Six** ----- Dak Ralter (Human, Male, Kalist VI)
- ℞ **Red Eleven / Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

Discussion:

Rogue Flight and Red squadron would see allot of action on the road to Hoth. They escorted convoys through the Ison corridor, investigated seldom used hyperplanes at Kwenn Space Station, battled the navy of Nuso Esva, and came into conflict with Jabiimi Nationalists.

Derra IV and the Formation of Rogue Group (3 ABY)

Active:

- ℞ **Rogue Leader** ----- Luke Skywalker (Human, Male, Tatooine)
- **Gunner** ----- Dak Ralter (Human, Male, Kalist VI)
- ℞ **Rogue Two** ----- Zev Senesca (Human, Male, Kestic Station)

- ℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)
- **Gunner** ----- Kesin Ommis (Human, Male, Coruscant)
- Two Flight** -----
- ℞ **Rogue Five** ----- Tycho Celchu (Human, Male, Alderaan)
- **Gunner** ----- Tarn Mison (Human, Male, Las Lagon)
- ℞ **Rogue Six** ----- Samoc Farr (Human, Female, Chandrilla)
- **Gunner** ----- Vigrat Pomoner (Iotran, Male, Iotra)
- ℞ **Rogue Seven** ----- Nala Hetsime (Human, Male, Pa Tho)
- **Gunner** ----- Cinda Tarheel (Human, Female, Socorro)
- ℞ **Rogue Eight** ----- Vekozev Kabir (Human, Male, Ahakista)
- ℞ ----- **Gunner** ----- Stax Mullawny (Human, Male, Corellia)
- ℞ **Rogue Nine** ----- Stevan Makintay (Human, Male, Hargeeva)
- **Gunner** ----- Barlon Hightower (Human, Male, Lantilles)
- ℞ **Rogue Ten** ----- Tarrin Datch (Human, Male, Duro)
- **Gunner** ----- Hosh Hune (Human, Male, Fondor)
- ℞ **Rogue Eleven** ----- Tenk Lenso (Human, Male, Glova)
- **Gunner** ----- Jek Pugilio (Human, Male, Glova)
- ℞ **Rogue Twelve** ----- Dash Rendar (Human, Male, Corellia)

Discussion:

Tragedy would strike when the Imperial 181st fighter group, led by Baron Soontir Fel, would destroy a rebel convoy and all of Renegade Flight. Luke would be given permission to expand Rogue Flight into a full squadron, but before he could do so he would be captured by a Wampa. Luke's friend Han Solo would rescue him from the Wampa, and Zev Senesca would locate them the next morning in his snow speeder. Following this, the rebels would learn the imperials had located their base, and so Rogue Flight, Blue Squadron, Green Squadron, and the smuggler Dash Rendar would be combined into a twenty-three-person strong "Rogue Group."

Battle of Hoth (3ABY)

Active:

- ℞ **Rogue Five** ----- Tycho Celchu (Human, Male, Alderaan)
----- **Gunner** ----- Tarn Mison (Human, Male, Las Lagon)
- ℞ **Rogue Seven** ----- Nala Hetsime (Human, Male, Pa Tho)
----- **Gunner** ----- Cinda Tarheel (Human, Female, Socorro)
- ℞ **Rogue Nine** ----- Stevan Makintay (Human, Male, Hargeeva)
----- **Gunner** ----- Barlon Hightower (Human, Male, Lantilles)
- ℞ **Rogue Twelve** ----- Dash Rendar (Human, Male, Corellia)

Discussion:

The battle of Hoth was a costly one. Out of the 23 pilots, Dak Ralter, Zev Senesca, Kit Valent, Vigrat Pomoner, Vekozev Kabir, Stax Mullawny, Hosh Hune, Tenk Lenso, and Jek Pugilio were killed in the battle. Additionally, Luke Skywalker, Samoc Farr, and Tarrin Datch had their snowspeeders shot out from under them, Wedge and Wes abandoned theirs after it suffered damage, and Hobbie and Kesin would take theirs on a suicide run into the lead AT-AT, surviving, and getting back to the rendezvous point in time for evacuation.

Rogue Squadron is Formed (3 ABY – 3.15 ABY)

Active:

One Flight -----

- ℞ **Rogue Leader** ----- Commander Wedge Antilles (Human, Male, Corellia)
- ℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)
- ℞ **Rogue Three** ----- **Barlon Hightower (Human, Male, Lantilles)**
- ℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

Two Flight -----

- ℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)
- ℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)
- ℞ **Rogue Seven** ----- **Nala Hetsime (Human, Male, Pa Tho)**
- ℞ **Rogue Eight** ----- [REDACTED] (Bothan) – Identity Classified.

Three Flight -----

- ℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)
- ℞ **Rogue Ten** ----- Tarrin Datch (Human, Male, Duro)
- ℞ **Rogue Eleven** ----- **Tarn Mison (Human, Male, Las Lagon)**
- ℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Left Rogue Squadron:

- ℞ **Rogue Leader** ----- Luke Skywalker (Human, Male, Tatooine)
----- left to train as a Jedi
- ℞ **Rogue Six** ----- Samoc Farr (Human, Female, Chandrilla)
----- Left to protect sister from Bounty Hunters
- ℞ **Rogue Seven** ----- Cinda Tarheel (Human, Female, Socorro)
----- Reassigned to Haven Base
- ℞ **Rogue Nine** ----- Stevan Makintay (Human, Male, Hargeeva)
----- Reassigned to command Green Squadron
- ℞ **Rogue Four** ----- Kesin Ommis (Human, Male, Coruscant)
----- wounded in suicide run on Veer's AT-AT

Discussion:

*The rebels were able to escape Hoth, and Alliance commanded the creation of Rogue Squadron from the remaining pilots. With Luke Skywalker unaccounted for due to his search for Jedi Master Yoda, Wedge was placed in command and promoted to Commander. He brought in Hobbie, Wes and Tycho from the original Rogue Flight; **Barlon**, **Nala**, Tarrin, and **Tarn** from the survivors of Rogue Group, and Will Scotain, Dix Rivan, the Bothan Pilot [REDACTED], and Kin Kian from other squadrons. Rogue Squadron acted as an escort for the rebel fleet and Skywalker would meet back up with him at the rendezvous outside the Galaxy. Due to his injuries and him often being needed elsewhere, Skywalker would only occasionally fly with the Squadron as the thirteenth member, on those occasions taking up the callsign Rogue Leader while Wedge would be Rogue One.*

Classified Mission

Active:

One Flight -----

℞ **Rogue Leader** ----- Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)

Two Flight -----

℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

Three Flight -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Tarrin Datch (Human, Male, Duro)

℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Discussion:

After Skywalker met back up with the fleet, an imperial strike cruiser ambushed the rendezvous site. Rogue squadron destroyed the craft, with Hightower taking damage to his engines. This damage would prove to kill Hightower, as during the rogues mission at [REDACTED] an unfixed part in the engines gave out and the X-Wing exploded. During the same battle Nala Hetsime would also be shot down and Rogue Eight, the Bothan [REDACTED], would give his life to ensure the successful completion of the mission. Following this mission Tarn Mison would leave the squadron, in order to fulfill the promise he made to the Bothan before he died.

Soon thereafter, Wedge, Will, and Hobbie would fly a solo mission in Y wings to Kessel, where they would free a group of captured rebel pilots, although Hobbie's ship was shot out from under him and he needed to take an extended medical leave due to the stress the black holes of the maw placed on his body.

Attack on Fondor and the Cloaked SSD (3.2 ABY)

Active:

One Flight -----

- ℞ **Rogue Leader** ----- Wedge Antilles (Human, Male, Corellia)
- ℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)
- ℞ **Rogue Three** ----- Karie Neth (Human, Female, ?)
- ℞ **Rogue Four** ----- Carithlee (?)

Two Flight -----

- ℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)
- ℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)
- ℞ **Rogue Seven** ----- Keir Santage (Human, Male, ?)
- ℞ **Rogue Eight** ----- Gemmer Sojan (Human, Male, Mimban)

Three Flight -----

- ℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)
- ℞ **Rogue Ten** ----- Tarrin Datch (Human, Male, Duro)
- ℞ **Rogue Eleven** ----- Captain Hanc Thorben (Human, Male, ?)
- ℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Discussion:

Out of the prisoners rescued, Karie Neth, Hanc Thorben, and Keir Santage would be drafted into rogue squadron. Additionally, Gemmer Sojan and Captain Carithlee would transfer from Blue squadron to fill the gaps in the squadron. They would go on to rescue more prisoners from Bakura, fought former Rogue Sarkli at Geonosis, destroyed a Tibana facility at Destrillon, took out a prototype Superlaser at Dubrillion, and destroyed a prototype Super Star Destroyer at Fondor. During the last battle Datch would be incinerated by the SSD's Turbolasers, and Gemmer would request transfer to green squadron to help rebuild it after the losses it took at the battle.

Luke returns and “Flying Bantha Squadron” (3.2ABY – 3.3ABY)

Active:

℞ **Rogue Leader** ----- Luke Skywalker (Human, Male, Corellia)

One Flight -----

℞ **Rogue One** ----- Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)

℞ **Rogue Three** ----- Karie Neth (Human, Female, ?)

℞ **Rogue Four** ----- Carithlee (?)

Two Flight -----

℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

℞ **Rogue Seven** ----- Keir Santage (Human, Male, ?)

℞ **Rogue Eight** ----- Shira Brie (Human, Female, Coruscant)

Three Flight -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Alph (Human, Male, ?)

℞ **Rogue Eleven** ----- Captain Hanc Thorben (Human, Male)

℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Discussion:

Luke would return as Rogue Leader, recruiting Alph and Shira Brie to fill the gaps in the squadron. They would go on several missions, including one to Cloud City. The Rogues would learn of an Imperial Armada transporting a Creature capable of messing with hyperspace and communications and who could potentially reveal the rebels secret base. Cobbling together four stolen Tie Fighters *with the remains of the Superlaser the rogues destroyed at Dubrillion*, Skywalker would lead what was nicknamed “Flying Bantha Squadron” Consisting of himself, Shira Brie, Alph, and Thorben. With their single use superweapon equipped ties, The four Rogues snuck into the armada and quickly destroyed it, although in the process Alph would be Vaped and Skywalker would accidentally shoot down Shira’s Tie when he was using the force to tell friend from foe. He would leave the squadron in disgrace, although he would later be exonerated when it was revealed Brie had secretly been an agent of the empire.

Operation: Quick Strike and the Vengeance Task Force (3.3ABY - 3.5ABY)

Active:

One Flight -----

- ℞ **Rogue Leader** ----- Wedge Antilles (Human, Male, Corellia)
- ℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)
- ℞ **Rogue Three** ----- Karie Neth (Human, Female, ?)
- ℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

Two Flight -----

- ℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)
- ℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)
- ℞ **Rogue Seven** ----- Keir Santage (Human, Male, ?)
- ℞ **Rogue Eight** ----- Gayla Riemann (Human, Female, Aldraig IV)

Three Flight -----

- ℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)
- ℞ **Rogue Ten** ----- Wister (Human, Male, ?)
- ℞ **Rogue Eleven** ----- Captain Hanc Thorben (Human, Male, ?)
- ℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Casualties:

- ℞ **Rogue Four** ----- Carithlee (Human, Male, ?)
----- Returns to original squadron following Hobbie's Recovery

Discussion:

In the time following the flight of flying Bantha Squadron, Wedge would resume command and recruit more members to the squadron, Specifically Gayla Riemann and Wister. Additionally, Hobbie would return from his medical leave at this time, and Carithlee left to return to his original squadron. The squadron would participate in Operation: Quick Strike, a series of deep-space engagements intended to harass Imperial military-industrial operations. They also defended the Hospital ship Hormuuz, fought several skirmish's in the Airam Sector, and engaged in the rebel campaign to kill Admiral Wooyou Senn, destroying his Super Star Destroyer, and scattering the imperial Vengeance Task Force, finally accomplishing the task at the Nocto System.

Battle of Gall and The Shadows of the Empire (3.5ABY - 4ABY)

Active:

Rogue Leader ----- Luke Skywalker (Human, Male, Tatooine)

One Flight -----

℞ **Rogue Leader** ----- Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Eight** ----- Gayla Riemann (Human, Female, Aldraig IV)

Three Flight -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Wister (Human, Male, ?)

℞ **Rogue Eleven** ----- Captain Hanc Thorben (Human, Male, ?)

℞ **Rogue Twelve** ----- Kin Kian (Human, Male, ?)

Casualties:

℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)

----- Ship Damaged

℞ **Rogue Five** ----- Dix Rivan (? ,Male, ?)

----- Killed in Battle

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

----- Astromech tried to take over ship to kill Luke, disabled

℞ **Chief Mechanic** – Viera Cheron (Human, Female)

----- Traitor, killed by wedge

Discussion:

Around 6 months into 3 ABY, Luke was able to determine Fett, with a carbonite frozen Han Solo in tow, was at Gall. Calling on rogue squadron for assistance, the Rogues would once again fly under Lukes leadership, attacking the imperials harboring Fett. The mission was a failure, Will's X-wing would be damaged, Rivan would be killed, and control of Janson's x-wing was taken by his astromech, who tried to shoot down Luke Skywalker. Skywalker was able to disable Jansons X-wing and they discovered that the Rogues Mechanic, Viera Cheron was responsible for the malfunction, with her being killed in a second attempt on Lukes life. Luke would leave the rogues once again, but wedge would come to his aid again at the outskirts of coruscant, where they would play a part in rescuing the millennium falcon and destroying Prince Xizor's Skyhook.

- ℞ **Red Ten** ----- Wister (Human, Male)
- ℞ **Red Eleven** ----- Captain Hanc Thorben (Human, Male)
- ℞ **Red Twelve** ----- Randi (?)

Discussion:

With the information gained by Bothan Spies and the confirmed by information the Rogue Obtained in the Battle of Kothlis, The Rebel Alliance learned of the construction of the Second Death Star at Endor and began assembling a task force to attack the station and kill the emperor. Veteran Rogues Neth, Celchu, and Kain would be assigned to help weaker squadrons, and the rogues would recruit Sila Kott, Griz Frix, Kirst, and Randi into the squadron, temporarily renaming Red Squadron in honor of their origins in facing the first Death Star. They would be assigned to Home One and complete several missions to prepare for the battle of Endor, including a raid on Cloud City's Tibanna Stockpile and the theft of Shuttle Tydirium for use by Han Solo and the Endor Ground Assault team.

- ℞ **Red Twelve** ----- Randi (?)

Killed during the flight through the Death Star's Reactor:

- ℞ **Red Seven** ----- Keir Santage (Human, Male)

Killed by the Executor:

- ℞ **Red Three** ----- Sila Kott (Human, Female, Toprawa)
- ℞ **Red Ten** ----- Wister (Human, Male)

Resigned:

- ℞ **Red Nine** ----- Krist (Human, Female)

Discussion:

*The Rebel fleet would be successful at Endor; Rogue Squadron racked up dozens of kill and Wedge himself fired the killing shot alongside Lando Calrissian on the Death Star II. Still, several rogues lost their lives in the battle, Kott, Frix, and **Thorben**, and Randi would lose their lives in dogfights and Santage would be killed during the Death Star II run. Shortly after the battle the rogues would lose two more members: On patrol with Kirst and Wister after the battle, Wedge would find the wreckage of the Executor. What was left of the ship was quickly destroyed, but not before a Turbolaser blast killed Wister. **Feeling Survivor's guilt for being the last member of her Flight and not wanting to fight anymore now that the Emperor was Dead, Krist resigned from the military.***

Bakura and Luke's last missions (4aby - 4.1ABY)

Active:

℞ **Rogue Leader** ----- Luke Skywalker (Human, Male, Tatooine)

One Flight -----

℞ **Rogue One** ----- Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Two** ----- Will Scotain (Human, Male, Brentaal IV)

℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

Two Flight -----

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

℞ **Rogue Seven** ----- Carithlee (Human, Male, ?)

℞ **Rogue Eight** ----- Gayla Riemann (Human, Female, Aldraig IV)

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

Discussion:

Soon after the battle of Endor, an imperial message probe would arrive from Bakura, with reports of being attacked by the Ssi Ruuvi. The Rebel Alliance decided coming to Bakura's aid would go a long way towards convincing imperial worlds to join them and so Luke Skywalker lead a task force and the rogues to stop the invaders, with Tycho and Carithlee coming back to the squadron to help fill out Two Flight. Hobbie and Carithlee would be injured in the battle, and Will and Gayla would resign from rogue squadron to Train the Bakura Defense force.

Around a Week after Endor, Luke would take the remaining Rogues, Wedge, Wes, and Tycho on a mission to Corellia, where they would fight General Weir and capture him, with Luke deciding to Formally resign as Rogue leader to focus on his Jedi Studies. The rogues, now including the healed Hobbie and Carithlee, would fight off the Nagaii at Endor before going on their last mission with Luke to defeat Grand Moff Nivers. Carithlee would be shot down during the battle and from the ground locate a tie landing strip for the rogues to destroy, tipping the scales in the rogues favor and allowing them to capture the Grand Moff.

The Six Rogues (4.1ABY - 4.2ABY)

Active:

Wing One -----

℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

Wing Two -----

℞ **Rogue Five** ----- Dllr Nep (Sullustan, Male, Sullust)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

Wing Three -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Plourr Ilo (Human, Female, Eiattu 6)

Support:

℞ **Targeter** ----- Winter (Human, Female, Alderaan)

℞ **Cilpari Resistance** ----- Elscol Loro (Human, Female, Ciplar)

Discussion:

*A month after Endor, the Rebel Alliance would officially reform as the New Republic. **Carithlee would be promoted and re assigned to lead a training squadron**, and Wedge, not wanting to be promoted up to general and out of rogue squadron, arranged a demotion for himself to Captain. Wedge would bring two new members into the squadron, Dllr Nep and Plourr Ilo, bringing their numbers up to six. Their first mission involved escorting a food convoy from the Cilpari resistance to Mrlsst. After two weeks of waiting at Mrlsst for their contact Targeter, an imperial task force led by Moff Tascl would attack the rogues. The rogues defeated the force but would get separated, with an Injured and shot down Janson and Tycho finally finding Targeter, an Alderaanian named winter, and the rest of the rogues being captured by Elscol Loro of the Cilpari Resistance.*

Tycho would decide to infiltrate the imperial base, while winter and Wes made their way to meet up with the rogues, who convinced Loro they were on the same side. The rogues would fly against an undercover Tycho, with Tycho turning on the imperials in the middle of combat, allowing the rogues to destroy the imperial force and provide enough of a distraction for Loro's resistance fighters to overrun the imperial base and capture Tascl. Following the battle, Loro would be offered a place in rogue squadron, which she would accept.

Loro's Time with Rogue Squadron (4.2 ABY – 4.5 ABY)

Active:

℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)

One Flight -----

℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

℞ **Rogue Five** ----- Dllr Nep (Sullustan, Male, Sullust)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

Two Flight -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Elscol Loro (Human, Female, Ciplar)

℞ **Rogue Eleven** ----- Plourr Ilo (Human, Female, Eiattu 6)

Support:

℞ **Smuggler Contact** ----- Mirax Terrik (Human, Female, Corellia)

℞ **Targeter** ----- Winter (Human, Female, Alderaan)

Discussion:

Loro would join rogue squadron, flying with them back to Mrlsst on escort duty and tangling with an interdictor Star Destroyer. The rogues would head to the planet to bid on the Phantom Ship Project created by Professor Falken. In the process Wedge would be arrested by imperial Loka Hask, with the rest of the rogues escaping due to the warning of Koyi Komad, a student of the Professor. The rogues would get help from an old friend of wedge's, Mirax Terrik, and together they would rescue Wedge and use a prototype weapon created by Falken to destroy Hask's ship.

Three months later the squadron would be a part of the attack on the Tof stronghold at Saijo, which would bring the Nagaii-Tof Invasion to an end. A month later the rogues would go on a mission to Tatooine to Assist Winter in investigating a weapons smuggling operation between the Empire's Captain Marl Semtin and Twi'lek gangster Firith Olan. The search would take them to the Darklighter's home, to Ryloth, and finally back to a battle above Tatooine, where they destroyed the imperial task force. During the battle Plourr Ilo would be shot down due to Elscol Loro disobeying orders and abandoning her during the battle. While Plourr would survive, Loro would be kicked out of the squadron by Antilles, and she would go back to her resistance roots.

℞ **Rogue Two** ----- Ibtisam (Mon Calamari, Female, Mon Calamari)

℞ **Rogue Three** ----- Nrin Vakil (Quarren, Male, Mon Calamari)

℞ **Rogue Four** ----- Dllr Nep (Sullustan, Male, Sullust)

Two Flight -----

℞ **Rogue Five** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

℞ **Rogue Seven** ----- Feylis Ardele (Human, Female, Commenor)

℞ ***Three Flight*** -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Ten** ----- Herian I'ngre (Bith, Female, Clak'dor IV)

℞ **Rogue Eleven** ----- Plourr Ilo (Human, Female, Eiattu 6)

Discussion:

Rogue squadron would be stationed at Commenor for a while, during which Wedge would use the time for recruiting and training new pilots for the squadron. Within a month, he recruited Feylis Ardele of the Commenor militia, the Mon Calamari Ibtisam, Quarren Nrin Vakil, and a Bith pilot named Herian I'ngre. Their training would be cut short when a Duke from Eiattu 6 would come to the Rogues to Reveal Plourr was the long-lost princess of their world. The rogues would escort Plourr home to learn that it was a trap set up by Moff Tavra in order to try to kill the princess. The rogues would defend Eiattu while Plourr would force Tavra to flee Eiattu. After the battle Plourr decided to remain behind to lead her world, although she promised to come to their aid if they ever needed her. The rogues would then leave to locate a missing StarLiner.

The Battle of Marlev IV (4.7 ABY)

Active:

One Flight -----

℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Two** ----- Ibtisam (Mon Calamari, Female, Mon Calamari)

℞ **Rogue Three** ----- Nrin Vakil (Quarren, Male, Mon Calamari)

Two Flight -----

℞ **Rogue Five** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

℞ **Rogue Seven** ----- Feylis Ardele (Human, Female, Commenor)

℞ ***Three Flight*** -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Eleven** ----- Plourr Ilo (Human, Female, Eiattu 6)

Casualties:

℞ **Rogue Four** ----- Dllr Nep (Sullustan, Male, Sullust)

℞ **Rogue Ten** ----- Herian I'ngre (Bith, Female, Clak'dor IV)

Discussion:

The rogues located the missing StarLiner at Marlev IV, where they would battle a group of ties. Wedge would be shot down and brought back from the brink of death by Sith magic conjured by a Devaronian Sorcerer, who brought him to his temple. A battle would ensue over the temple's dark side power and the rogues would destroy it, although Nep and I'ngre would die in the process.

Brentaal IV (4.7ABY – 4.8ABY)

Active:

One Flight -----

- ℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)
- ℞ **Rogue Two** ----- Ibtisam (Mon Calamari, Female, Mon Calamari)
- ℞ **Rogue Three** ----- Nrin Vakil (Quarren, Male, Mon Calamari)
- ℞ **Rogue Four** ----- Xarcce Huwla (Turnroth, Female, Saloch)

Two Flight -----

- ℞ **Rogue Seven** ----- Feylis Ardele (Human, Female, Commenor)
- ℞ **Rogue Eight** ----- Avin Beruss (Human, Male, Illodia)

Three Flight -----

- ℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)
- ℞ **Rogue Ten** ----- Dar Keyis (Human, Male, Churba)
- ℞ **Rogue Eleven** ----- Plourr Ilo (Human, Female, Eiattu 6)
- ℞ **Rogue Twelve** ----- Standro Jcir (Rodian, Male, Rodia)

Support:

- ℞ **New Chief Mechanic** ----- Koyi Komad (Twi'lek, Female, Ryloth)

Discussion:

Following Marlev IV, the rogues would go and help General Han Solo Liberate Kashyyyk. Following the successful completion of the mission, Rogue Squadron would spend the next month and a half flying reconnaissance missions as well as recruiting and training new squadron members, all in preparation for an upcoming assault on Brentaal IV. The members they recruited to fill the squadron were Dar Keyis, Standro Jcir, Avan Beruss, and Xarcce Huwla. Xarcce would be a reluctant recruit, as she was concerned with the squadrons high fatality rate, but agreed to stay with the squadron until she could get transferred. The rogues would also get a new Chief mechanic at this time: Koyi Komad, the student they met on Mrlsst.

Once the preparations were complete, the Rogues would fly with General Salm to Brentaal IV, where they would fight the 181st Imperial Fighter Wing, led by Baron Soontir Fel. The rogues would suffer several casualties, with Janson and Ibtisam being shot down but surviving, and Dar Keyis and Standro Jcir would be vaped, but ultimately the rebels would be victorious. Fel's fighter would be disabled during the battle, and he would take the chance to defect from the empire and join rogue squadron.

Fel Joins the Rogues (4.8ABY – 5ABY)

Active:

℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)

One Flight -----

℞ **Rogue Two** ----- Ibtisam (Mon Calamari, Female, Mon Calamari)

℞ **Rogue Three** ----- Nrin Vakil (Quarren, Male, Mon Calamari)

℞ **Rogue Four** ----- Xarce Huwla (Turnroth, Female, Saloch)

Two Flight -----

℞ **Rogue Five** ----- "Hobbie" Klivian (Human, Male, Ralltiir)

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

℞ **Rogue Seven** ----- Feylis Ardele (Human, Female, Commenor)

Three Flight -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

℞ **Rogue Eight** ----- Avin Beruss (Human, Male, Illodia)

℞ **Rogue Ten** ----- Colonel Soontir Fel (Human, Male, Corellia)

Support:

℞ **Chief Mechanic** - Koyi Komad (Twi'lek, Female, Ryloth)

Discussion:

Fel was debriefed and agreed to join rogue squadron on one condition: they would find and bring his wife (who was Wedge's Sister) to safety. Hobbie and Wes would go to Corellia with former rogue Plourr in hopes of finding her, but Wedge's sister had already gone into hiding.

Soon after this Fel and the rogues would be assigned to escort Leia to Eiattu 6, where she was secretly meeting with head of the empire Sate Pestage, who wished to defect. Winter and Tycho would be captured and the rogues would rescue them with help from Pestage. The Director of Imperial Intelligence, Ysanne Isard, would learn of this and would put a Warrant out for Pestage's arrest, and Pestage would flee to the Ciutric Hegemony for safety. The rogues would be sent there to try and bring Pestage in, but the mission would ultimately be a failure. Pestage would be killed by the leader of the Ciutric hegemony, Krennal, and Ibtisam would be shot down and killed during the battle. This would have a great impact on Vakil, who would take time off from the squadron to grieve for his lost friend, and eventually decided to transfer to a training squadron.

Mindor (5.2ABY)

Active:

Wing One -----

℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)

℞ **Rogue Four** ----- Xarcce Huwla (Turnroth, Female, Saloch)

Wing Two -----

℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)

Wing Three -----

℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)

Wing Four -----

℞ **Rogue Ten** ----- Colonel Soontir Fel (Human, Male, Corellia)

Casualties:

℞ **Rogue Seven** ----- Feylis Ardele (Human, Female, Commenor)

----- Vaped

℞ **Rogue Eight** ----- Avin Beruss (Human, Male, Illodia)

----- Vaped

Discussion:

Over the next two months a new threat would arrive to the galaxy, a mysterious raider known as Shadowspawn in command of a force of Tie Defenders. The Rogues would set a trap for the Tie Defenders by constructing a fake Luxury Liner and hiding their X-wings inside of it, bursting out to attack Shadowspawn's forces when they attacked the liner.

*The rogues were then taken off the mission by General Calrissian, who thought the threat had been neutralized and that the rogues were needed elsewhere. Soon after though, Leia would come to them with the message Luke was in danger and needed their help, so Antilles rounded up the rogues and they went to Mindor. The rogues would lose two members on this mission, *Ardele and Beruss*, with Hobbie also being sent E.V. during the battle.*

Rogue Squadron Disbanded (5.5ABY-6.25ABY)

Casualties:

- ℞ **Rogue Ten** ----- Colonel Soontir Fel (Human, Male, Corellia)
----- Captured by empire, reindoctrinated by Thrawn,
- ℞ **Rogue Nine** ----- Tycho Celchu (Human, Male, Alderaan)
----- Captured, spent time at Lusankya and Clearance revoked.
- ℞ **Rogue Four** ----- Xarce Huwla (Turnroth, Female, Saloch)
----- Resigned from squadron
- ℞ **Rogue Six** ----- Wes Janson (Human, Male, Taanab)
----- Reassigned to lead training Squadron
- ℞ **Rogue Four** ----- "Hobbie" Klivian (Human, Male, Ralltiir)
----- Reassigned to lead training Squadron
- ℞ **Rogue Leader** ----- Captain Wedge Antilles (Human, Male, Corellia)
----- Assigned to press tour

Discussion:

For the next three months the rogues would continue to fly missions, including several key battles against Isard's forces, but the rogues would face great attrition during this time. First, Xarce Huwla's Transfer request would finally be approved, and she would leave the squadron. Then, Soontir Fel and his wife would be kidnaped by Isard and sent to Grand Admiral Thrawn in the Unknown Regions, where he would be convinced to rejoin the Empire. Soon after this, Tycho would volunteer to fly a mission to imperial center in a stolen Tie Fighter, in hopes of both finding information on how to take the Capital and on what happened to their friend Fel. He would be uncovered and captured by Isard, who would send him to Lusankya, her personal prison renowned for reprograming prisoners into sleeper agents for the empire. When Tycho finally escaped, he could no longer be trusted, and the New Republic forced him to resign from active service. With only three Rogues left, the New Republic ordered Rogue Squadron to be disbanded, with Hobbie and Wes each being assigned training squadrons and Wedge being sent on a yearlong press tour with the purpose of converting more worlds to the new republic.

Rebuilding Rogue Squadron (6.25 -6.5 ABY)

Active:

One Flight -----

Three Flight -----

℞ **Rogue Nine** ----- Flight Officer Corran Horn (Human, Male, Corellia)
----- R2 Series (Whistler)

℞ **Rogue Ten** ----- Ooryl Qrygg (Gand, Male, Gand)

℞ **Rogue Eleven** ----- Lujayne Forge (Human, Female, Kessel)

℞ **Rogue Twelve** ----- Andoorni Hui (Rodian, Female, Rodia)

Support Personnel:

℞ **Executive Officer** ----- Captain Aril Nunb (Sullustan, Female, Sullust)

℞ **Squadron Quartermaster** ----- Emtrey (M-3PO droid)

℞ **Chief Mechanic** ----- Zraii (Verpine, Male, Roche G42)

Discussion:

Following the end of the press tour, Wedge would be given permission to rebuild Rogue Squadron from the ground up. After several months of intense deliberation and training, Wedge had his squadron, although he would convince Ackbar to allow him to replace Deegan with Gavin Darklighter and Aril Nunb with Tycho. Convincing Ackbar to allow Tycho to be the squadrons XO was tough, although Ackbar relented when Tycho agreed to remain under house arrest and only fly bomb-rigged, defenseless starships for training and battles.

Journey to and the Ambush at Talasea (6.5ABY -6.6ABY)

℞ **Rogue Twelve** ----- Andoorni Hui (Rodian, Female, Rodia)

Support Personnel:

℞ **Executive Officer** ----- Captain Tycho Celchu (Human, Male, Alderaan)

℞ **Squadron Quartermaster** ----- Emtrey (M-3PO droid)

℞ **Chief Mechanic** ----- Zraii (Verpine, Male, Roche G42)

℞ **Smuggler Contact** ----- Mirax Terrik (Human, Female, Corellia)

Discussion:

The newly formed rogue squadron would see their first battle on the way to their new training base on Talasea, when an interdictor cruiser would accidentally pull them from hyperspace while trying to capture Mirax Terrik. The Rogues would only suffer minor casualties, with Corran's X-wing being disabled and having to be towed back to base.

The same could not be said about their second engagement, when a group of Storm troopers infiltrated the Talasea base. While the storm troopers were killed before they could blow the base, the Corran, Gavin, and Andoorni would be seriously injured and spend 1-2 days in Bacta, while Lujayne Forge would be killed in her sleep.

First Battle of Borleias (6.65 ABY)

Active:

Casualties:

Killed above Blackmoon:

1. **Rogue Two** ----- Peshk Vri'syk (Bothan, Male, Bothawui)
2. **Rogue Twelve** ----- Andoorni Hui (Rodian, Female, Rodia)

E.V.:

3. **Rogue Ten** ----- Ooryl Qrygg (Gand, Male, Gand)
----- Lost Right Arm
4. **Rogue Eight** ----- Erisi Delart (Human, Female, Thyferra)
5. **Rogue Three** ----- Nawara Ven (Twi'lek, Male, Ryloth)
6. **Rogue Six** ----- Riv Shiel (Shivistian, Male, Uvena III)

Support Personnel:

- ℞ **Executive Officer** ----- Captain Tycho Celchu (Human, Male, Alderaan)
- ℞ **Squadron Quartermaster** ----- Emtrey (M-3PO droid)
- ℞ **Chief Mechanic** ----- Zraii (Verpine, Male, Roche G42)

Discussion:

Still reeling from Lujayne's Death, the rogues would be assigned to the task force that was preparing for freeing Coruscant from imperial rule. This would eventually take them to Borleias, where they would attempt to take the planet as a staging point for their campaign. However, due to the negligence of the Bothan General Kre'Fey, the mission would be disastrous, with Peshk and Hui being killed and Erisi, Ooryl, Narawa, and Shiel losing their X-wings.

Second Battle of Borleias (6.7 ABY)

Active:

Wing One -----

℞ **Rogue Leader / Rogue One** ----- Commander Wedge Antilles (Human, Male, Corellia)
----- R5-G8 (Mynock)

℞ **Rogue Seven** ----- Rhysati Ynr (Human, Female, Bespin)

Support Personnel:

℞ **Rogue Ten** ----- Ooryl Qrygg (Gand, Male, Gand)

℞ **Rogue Eight** ----- Erisi Delart (Human, Female, Thyferra)

℞ **Rogue Six** ----- Riv Shiel (Shivistian, Male, Uvena III)

℞ **Executive Officer** ----- Captain Tycho Celchu (Human, Male, Alderaan)

℞ **Squadron Quartermaster** ----- Emtrey (M-3PO droid)

℞ **Chief Mechanic** ----- Zraii (Verpine, Male, Roche G42)

℞ **Smuggler Contact** ----- Mirax Terrik (Human, Female, Corellia)

Discussion:

Following the battle, Corran Horn would have his droid analyze the battle and he found a potential weakness they could exploit in a second attack: a power conduit susceptible to a trench run attack. With only six X-wings, Wedge, Bror, Corran, Nawara, Gavin, and Rhysati would fly in the second battle of Borleias. The mission would be a success, although Corran had to be left behind after a lucky shot by a tie destroyed his extra fuel tank he needed for the return journey. Luckily, Mirax Terrik had followed the rogues to the battle to warn them of a potential trap, and so she was able to rescue Corran once again.

Casualties:

- ℞ **Rogue Four** ----- Bror Jace (Human, Male, Thyferra)
----- Killed on Leave
- ℞ **Rogue Ten** ----- Ooryl Qrygg (Gand, Male, Gand)
----- Recovering from Prior Injuries

- ℞ **Chief Mechanic** ----- Zraii (Verpine, Male, Roche G42)
- ℞ **Smuggler Contact** ----- Mirax Terrik (Human, Female, Corellia)

Discussion:

The rogues would move into Borleias after the battle and defend it while the new republic provisional council decided their next move. Bror Jace would go on leave to visit a dying relative and would be ambushed by an imperial interdictor, with the rogues finding the remains of his x-wing soon after. Needing new members, Wedge would recruit Pash Cracken and Aril Nunb would join the squadron. They would defend Borleias from a scouting attack from one of Zsinj's ships, and would track the ship back to Mrlsst and destroy it.

- ℞ **Black Sun** ----- Zeka Thyne (Hybrid, Male, Corellia)
- ℞ **Black Sun** ----- Inyri Forge (Human, Female, Kessel)

Discussion:

By this point the New Republic decided that the invasion of coruscant would be a go, and rogue squadron would lead it. First going to Kessel, the rogues negotiated for the release of Black Sun Members, including Fliry Vorru, Zeka Thyne, and Lujayne Forge's Sister Inyri, in hopes they could be placed on coruscant to help destabilize Isard's hold on the world. The rogues would then sneak into coruscant themselves, finding several allies, including Tycho's old friend Winter, Corran's CorSec Partner Iella Wessiri, and Asyr Sei'lar of the Coruscant Resistance.

- ℞ **Former Black Sun** ----- Inyri Forge (Human, Female, Kessel)

Discussion:

With the help of their allies on Coruscant as well as Ackbar's Fleet, Coruscant would be freed from Isard's rule. This was not without a cost though. Aril Nunb would be captured and not rescued until after Coruscant was liberated. While Zekka would be killed and Inyri would join the rogues, most of the Black Sun would disappear. Additionally, Corran's fighter would be shot down and secretly captured by the Imperials, while Tycho would be arrested for his murder. Finally, Isard would unleash the Krytos Virus on Coruscant before she 'left,' infecting many of the non-human rogues and leaving behind a terrorist group led by Kirtian Loor.

Discussion:

Following the battle of coruscant, Corran would be sent to Lusankya and would work to escape with the help of general Dodonna. Meanwhile Tycho would be defended by Narawa in court while the rogues worked to get protect Bacta shipments and find a cure for the Krytos Virus. They would raid the Yag-Dhul space station, fight Kirtan Loor's terrorists on coruscant, and made an ally in the Twi'lek warrior Tal'dira, who supplied them with the Ryll Kor spice to help with treating the Krytos Virus. In the end, Corran would escape Lusankya and clear Tycho's name. With Corran knowing where her prison was, Isard had the Lusankya (which was a super star destroyer buried underneath a city block in coruscant) took off and headed to Thyferra with Erisi, who was secretly working for Isard the entire time.

- ℞ **Chir'Daki One** ----- Lieutenant Tal'dira (Twi'lek, Male, Ryloth)
- ℞ **New Republic Contact** ----- Winter (Human, Female, Alderaan)

Discussion:

The New Republic decided they could not go after Isard, and so the Rogues resigned and began their own private war with Isard and The Thyferrians. Pash would be the only member to not resign, because his father was in charge of NR Intelligence and no one would believe his son wasn't on a government assigned mission. Wedge and his squadron would set up shop in the Yag'Dhul Space station and begin launching attacks on Isard's Bacta Convoys and on the ground at Thyferra. They would gain several new and old allies on the way: Smugglers Booster Terrik and Talon Karde would lend their services, Tal'dira and his squadron of Chir'Daki starfighters would join their raids, and the former rogues Elscol Loro and Bror Jace (who faked his death) would be found leading the resistance on the ground. Bror would rejoin the squadron after the battle at the Alderaanian Graveyard, where the rogues would lose Shiel, but destroy Isards Victory class Star Destroyer and find an old Alderaanian Warship called the Valiant.

℞	Squadron Quartermaster -----	Emtrey (M-3PO droid)
℞	Chief Mechanic -----	Zraii (Verpine, Male, Roche G42)

Discussion:

The rogues would continue their war against Isard. Bror would take Shiels Place in the squadron and Aril would be reassigned to command the Valiant. They whittled away her remaining star destroyers, with one defecting to them and another surrendering to Booster Terrik, before finally taking the fight to Thyferra. They would be victorious: Isards shuttle was shot down, Fliry Vorru was captured, Erisi Delart was killed, and the Lusankya would be captured, although it's prisoners would still be missing. Following the celebrations, Wedge and his people would return to the new republic, with Tal'dira joining the squadron while Aril Nunb resigned to remain commander of the Valiant, Bror Jace remained with his people, and Nawara Ven became the new Executive Officer, as injuries obtained in the battle resulted in him losing his leg and being unable to fly.

- ℞ **Rogue Twelve** ----- **Kin Kian (Human, Male)**

Support Personnel:

- ℞ **Chief Mechanic** ----- Koyi Komad (Twi'lek, Female, Ryloth)

Discussion:

*While the Rogues were going Rogue, The New Republic needed to continue to have a Rogue Squadron of their own for political purposes. Thus, was created what became known as the "Ersatz Rogue Squadron." Hobbie Klivian would be pulled from his training squadron to lead the stand in squadron, and he would bring in former rogues Will Scotain, Gayla Riemann, Wes Janson, Carithlee, **Stevan Makintay, and Kin Kian**. The Group would be rounded out by **Pedna Scotain** (a Chev who Will rescued from slavery); **Ran Kether** and **Koobis Nu** from Gauntlet Squadron; and **Kenn Nitram** and **Khe-Jeen Slee** from Corsair Squadron. The squadron would be disbanded when Antilles rogues rejoined the new republic, but several members of the Ersatz squadron would join the real rogue squadron to fill the gaps.*

Discussion:

Upon returning to coruscant, Wedge would temporarily leave rogue squadron, taking Janson with him, to form a new squadron to help in the fight against Zsinj. Tycho would become Rogue Leader and the rogues would fly several missions, temporarily joined up with General Crispin's Task force at Talasea, before being reassigned to General Solo's command ship to help with the hunt for Zsinj. At this point Ynr decided to resign from the squadron and would marry Nawara Ven.

Discussion:

Following the Zsinj campaign, Tal'dira and Kether would leave the squadron and so Janson and Myn Donos would transfer over to rogue squadron to fill their spots. Sometime after that, Pedna would also leave the squadron and would be replaced by Kenn Nitram.

*By 9 ABY, the rogues would find themselves in the midst of the meddling's by a new imperial warlord seeking to put the empire back together: Grand Admiral Thrawn. They would be ambushed at Bpfassh while escorting Leia Organa Solo, defend the Sluis Van Shipyards, and would lead the fight for the katana fleet. While the rogues were able to push back the imperials, they lost the katana fleet, **as well as Ken and Target Nu.***

- ℞ **Squadron Quartermaster** ----- Emtrey (M-3PO droid)
- ℞ **Chief Mechanic** ----- Koyi Komad (Twi'lek, Female, Ryloth)

Discussion:

The Rogues would bring Khe-Jeen Slee and Lyr Zatoq into the squadron to fill their ranks, and did their best to defend the New Republic from Thrawn's attacks, now bolstered by Katana fleet dreadnoughts and crewed by an endless supply of clones. They would be ambushed at Filve (again while flying cover for Leia), fight to protect their fleet at Qat Chrystac, and was a part of the battle of Bilbringi, where Thrawn was killed and his campaign was ended.

Following this battle, Wedge would be promoted to General and would be charged with liberating the Ciutric Hegemony from the imperial warlord Krennal. They would first take Liinade III, then rescue Lusankya prisoners from Commenor, before being lured into a trap at Dista. They would suffer several casualties: Lyr Zatoq and Khe-Jeen Slee were killed, Wes Janson and Asyr Sei'lar were severely wounded, and Corran Horn's X-wing was damaged. The rest of the rogues only survived due to the intervention of two Tie Defender Squadrons, who took the Rogues minus Janson and Asyr to the secret base of Ysanne Isard, who survived the battle of Thyferra and was battling Krennal (who himself was working with a clone of Isard). The rogues would form a temporary alliance, launching an attack on Ciutric, killing Krennal and clone Isard and saving the rest of the Lusankya's prisoners. Meanwhile, the real Isard would betray the rogues and try to steal back the Lusankya, although she would be killed by Iella Wessiri in the process.

Glossary

Using the Wookieepedia appearances list for the Rogue Squadron Page, I've created a Glossary where you can look up whatever book, comic, game, or movie that you are reading/watching with rogue squadron in it, and it will tell you what page to go to for the Dramatis Personae. So far, this only include up to the end of Isards Revenge.
