

What have you achieved in the pilot? - BV

One of the real achievements from this PicoH pilot and one of the things I've really enjoyed seeing is at my students starting to actually adapt the code in different ways and be more creative rather than following instructions or me showing them how to do it, and then then kind of copying or imitating.

They're actually thinking, oh, why don't we make it shake its head or why don't we make its eyes get angry if they get an answer wrong.

That's been really exciting for me.

And I think that's the power of having a physical device.

And then they start to see the purpose of it, and they start to understand why they're doing it, and they start to have more creative ideas.
