

NFTL is a fun league. I'm not thinking too hard about this. WWWWD = What would waterwheel do (with the roster as captain)?

1. Misaki -- Ty -- FK -- First -- Remoslice

A top player in Ty paired with two very good players in Misaki and FK. The only thing is how will their fourth ball play. WWWWD: Play Remoslice as the 4th. Probably not worse defensively than First but a lot juicier with the flag.

2. Agency -- globus-lag -- weeb something (Elsa) -- Snowball -- top kekker

Talented friend team. They need to actually focus and have Elsa not fuck around though so that could be their downfall. Top kekker only makes that worse. WWWWD: Play top kekker. Snowball is too laggy generally and if you're gonna troll go full troll.

3. NameLEss -- Ok I'm A Bot -- Deafheaven -- no name -- raymond53

NameLEss was the last person I thought would go hard for OIAB so that was kind of surprising. And ya know I personally think I am the biggest steal here, so someone getting this 1-2 punch with any amount of TCs is huge. No idea the NF prowess of the other players. WWWWD: My gut says play wanker.

4. Dragonbeast -- jig -- d4nk -- Zig! -- Tim Hortons

Dragonbeast made a good trade for Zig! since we've seen Z will selflessly sit and guard the base which I will not. That being said, I'm trying to convince myself that Dragon/jig/d4nk are not all the exact same player and I don't know how that will work. WWWWD: Play the top 4 or give Espeluznante a shot.

5. Syniikal -- ez -- Alphachurro -- Gasol -- mP

This is such a weird collection of players, I don't know why I feel that way but I do. So normally I rank a team like that last and they end up kinda good. Unfortunately this team is ripe for ping abuse so I'm putting them here. WWWWD: mP in, Gasol in.

6. Thenewguy. -- Ball-E -- Will1119 -- I'm a horse -- liu kang

TNG probably has the biggest load to carry in the league. Not bad players around him but he will still need to be the best with the flag and defensively and his #2 will have problems on Dallas. WWWWD: liu kang in. Think his defensive mechanics are good enough to slow down breakaways.

7. Ref -- q42 -- sidewalk -- ASAP -- CoolCat

Smally went for his patented “no splash” spending style, not going all out for the biggest names and trying to build a strong all around squad. Unfortunately, this is just a rehash of refined’s last team. It wasn’t good enough to be competitive then, don’t think it is now. WWWWD: PUT MR. AWESOME IN

8. Fender -- DT -- 777z -- Skwid -- Juke Juice

I don’t believe the DT negative NF IQ thing, but I just don’t know enough about them overall to put them above other teams. It’s really just “777z used to be bad at NF 3 years ago and glob said Skwid was bad.” WWWWD: Schedule games during OTI as an easy excuse.

HOPE I WIN THE CASH PRIZE
