NOTE: If you have any comments, something you want to add, or want to point out a mistake, please do send me a message at Discord.

Hello hello! Here I collect some of the most useful and most used Discord Bots you may use for your game discord server! If you instead want a short guide on making your very own Discord Bot, please Click Here instead. Anyways, enjoy!

Luisa Discord Bots 

Luisa's Helper | List Maker | PKO Timers

Luisa's Helper: This is a Discord Bot that makes lists of people in voice chat in discord. It also has simple functions such as items/monsters database lookup and tweaks/guides sharing. It is constantly updated with new functions! to use, Click Here to invite to your discord (you need inviting permissions in your discord server), then, to see current functions, write +helper in any chat and hit enter to send the message. Bot should answer right away. More Info.

List Maker: This is a Discord Bot that makes lists of people in voice chat in discord without Luisa's Helper's extra functions. To use, Click Here to invite to your discord (you need inviting permissions in your discord server), then join a voice chat and write .list in any channel and press enter to send the message. Bot should make a list of the people in the selected voice channel right away. More Info.

PKO Timers: A bot specialized in Pirate King Online's maze timers. To use, Click Here to invite to your discord (you need inviting permissions in your discord server), then join a voice chat and write .dw .ca .fc or similar short names of mazes in any channel and press enter to send the message. Bot should give you a timer of how much time is left for that maze right away. More Info.

MEE6 

Webpage | Invite Bot

Pretty much an all-in-one bot, I highly recommend reading the website to see the full potential of this bot. It can create welcome and goodbye messages for your members joining and leaving. Also, it includes a fun leveling by sending messages system which can keep your guild entertained when there are no mazes.

Accord 

Webpage | Invite Bot

This is a bot that allows you to set greeting and goodbye messages so you know when someone left or joined your discord server. Also, it can show you the profile pictures of people in your server, but most importantly, it can set timers for your guild to use... examples of it would be to track down the respawn of a boss, or to keep a track of time in a guild bidding. Check the webpage for instructions.

GiveawayBot 

Webpage | Invite Bot

This is a bot that creates giveaways in your discord server. It is useful whenever you want to giveaway stuff (say, imps or an item) as a prize for being nice guildies. Check the webpage for instructions.

Smoogle Translate

Webpage | Invite Bot

A bot that automatically translates messages into other languages. It can take a bit to learn how to use properly, but under certain circumstances such as announcements it can get pretty useful. Check the webpage for instructions.

Dank Memer 

Webpage | Invite Bot

A bot with a fun system of message-based games, which its main purpose is to entertain people while there is not much to do. Check the webpage to see everything it offers!

LunaBot 

Webpage | Invite Bot

A very complete music bot to give your battles the best soundtracks! Check the webpage for instructions.
