Positions Hiring For: Electrical Engineer

Website: <http://www.burnsmcd.com/>

About: We are a full-service engineering, architecture, construction, environmental and consulting solutions firm, based in Kansas City, Missouri. Our multi-disciplined staff of 5,500 includes engineers, architects, construction professionals, planners, estimators, economists, technicians and scientists, representing virtually all design disciplines. We plan, design, permit, construct and manage facilities all over the world, with one mission in mind: Make our clients successful.

Positions Hiring For: Engineers (all disciplines)

Website: <https://www.capitalinnovators.com/>

About: Capital Innovators provides startups with the resources and connections they need to get to the next level. Through proprietary processes and techniques developed and iterated on over the fund's 5 year history, the Accelerator Program has consistently been ranked in the top 5% of programs across the country.

We provide \$50,000 in seed funding, mentorship from a seasoned pool of knowledgeable experts, stellar perks, educational and social events, and the opportunity to pitch to angel investors and venture capitalist firms at the end of the program. Although an incredibly large amount of applications are received for the 12-week Accelerator Program, only five to six companies per class are accepted. Two cohorts are run each year – one in the Fall and one in the Spring.

Positions Hiring For: Looking for candidates with background in Computer Science and/or a Business related major.

Website: <http://claimacademystl.com/>

About: Claim Academy is a St. Louis-based developer boot camp that offers 12-week classes in Full Stack Java and .NET/C# programming, as well as shorter classes in software development, technology and career development. Claim Academy promises to transform novices into industry ready, software developers/software engineers through rigorous coursework taught in-person by expert instructors.

Participants complete pair programming work with mentors and instructors and produce a coding final project, which they present to potential employers and other interested parties on demo day. Career training and services, as well as placement assistance, are provided.

Positions Hiring For: Prospective Software Developers

Website: www.dotfoods.com

About: Owned and operated by the Tracy family for more than 55 years, Dot Foods is the nation's first and largest food redistributor. We offer more than 112,000 products and deliver them in LTL (less-than-truckload) quantities to distributors in all 50 states and over 25 countries. Robert Tracy founded Dot Foods with the support of his wife Dorothy in 1960. RT and Dorothy knew if their new company was going to be a success, it would have to be built on a strong foundation. So they instilled a set of values within Dot that has never wavered in 55 years. Today, the trucks in the Dot Transportation fleet bear our brand promise: Trusted values. Innovative solutions. Shared growth. It reminds our employees what we expect of them and what our business partners can expect from us.

Positions Hiring For: Associate District Sales Manager, Business Development Manager, Programmers, Client Service Analyst, Supply Chain Management

Website: <http://careers.express-scripts.com/>

About: At Express Scripts we believe in practicing pharmacy smarter. We put medicine within reach of tens of millions of people by aligning with our customers, taking bold action and delivering patient-centered care to make better health more affordable and accessible.

Headquartered in St. Louis, Express Scripts provides integrated pharmacy benefit management services, including network-pharmacy claims processing, home delivery pharmacy care, specialty pharmacy care, specialty benefit management, benefit-design consultation, drug utilization review, formulary management and medical and drug data analysis services. Express Scripts also distributes a full range of biopharmaceutical products and provides extensive cost-management and patient-care services.

Positions Hiring For: Technology interns across multiple areas. Full Time positions in Software Engineering, Information Security, Architecture, Infrastructure, and Engineering.

LOVE KIDS AND COMPUTER SCIENCE? COME WORK FOR GLOBALHACK THIS SUMMER!

GlobalHack's Story

In 2013, frustrated by the lack of companies founded on software prototypes, our founders set out to prove that great software could be built over a weekend...and thus GlobalHack was born! We have been organizing and executing 3-day software competitions, also known as hackathons, since 2014--first with a corporate mindset, and in 2015 on with a civically-minded outlook. In 2016, we decided to turn our attention to the talent pipeline in St. Louis, and start offering a series of youth programs, with the ultimate goal of teaching middle and high schoolers the basic principles of computer science, and set them on a path to contribute to society through technology and software development.

Current Youth Programs

Currently, we offer 3-hour introductory workshops, focused on teaching an introduction to web development, game design, and mobile app design. We also offer several day-long design challenges, in which students develop both their coding-related thinking and their soft skills like public speaking and teamwork.

Our Summer Camp

This summer, we are launching a coding camp in partnership with the University of Missouri St. Louis. This camp will run in one-week sessions for 8 weeks (June 4th through August 5th, with a break July 3rd to July 10th). Courses taught will include topics such as "Learning Java through Minecraft Mods," "Coding in Python," and "Intro to Web Development."

More Info and Contact

Visit globalhack.org/youth/summer for more information on our company and email delia@globalhack.org to express interest and next steps.

MONSANTO

Website: <http://www.monsanto.com/pages/default.aspx0>

About: Monsanto is a sustainable agriculture company. We deliver agricultural products that support farmers all around the world.

We are focused on empowering farmers—large and small—to produce more from their land while conserving more of our world's natural resources such as water and energy. We do this with our leading seed brands in crops like corn, cotton, oilseeds and fruits and vegetables. We also produce leading in-the-seed trait technologies for farmers, which are aimed at protecting their yield, supporting their on-farm efficiency and reducing their on-farm costs.

We strive to make our products available to farmers throughout the world by broadly licensing our seed and trait technologies to other companies. In addition to our seeds and traits business, we also manufacture Roundup® branded herbicides and other herbicides used by farmers, consumers and lawn-and-garden professionals.

Monsanto could not exist without farmers. They are our customers--the lifeblood of our company. More important, they are the support system of the world's economy, working day in and day out to feed, clothe and provide energy for our world.
