

ELIXIR at ECCB 2018

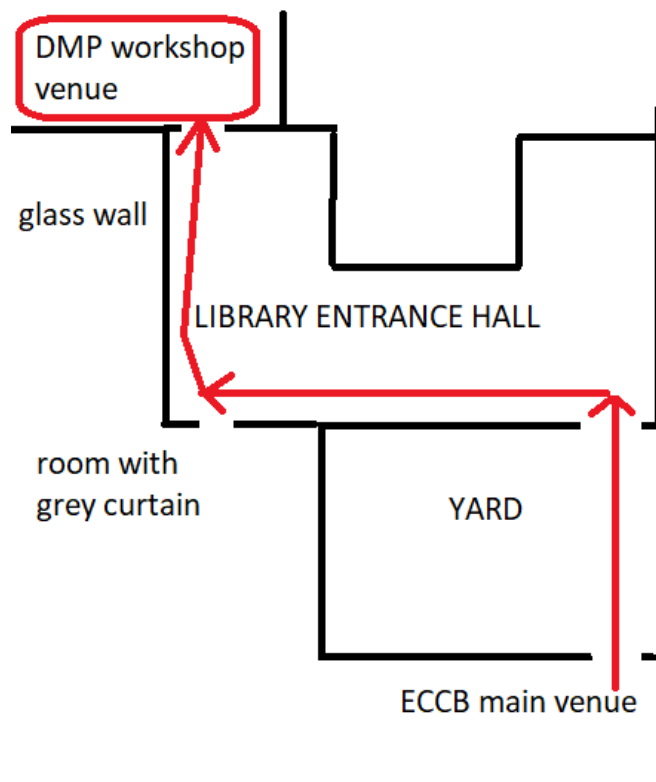

Implementation of Data Management Plans & Data Stewardship in practice

Date: September 11, 2018

Time: 17.30 - 19.00

Location: ECCB 2018, Athens, Room A2.00.113 (ground floor in the library building)

Short link for this page: <https://bit.ly/2PNmu6v>

Summary

Collecting, curating storing and exchange or sharing research data is a constant challenge that has become more difficult with the complete digitalisation of the modern research. Larger projects and organisations now bring into play data stewards who organise research data and support researchers in these efforts.

The FAIR principles help to assess the quality of one's data management. In this workshop, we will present tools to help data management and stewardship as well as bring examples of how such principles of data management perform in larger studies. We will touch on ethical, legal and data protection issues as well as the limitations imposed by data owners. We will also have an open discussion on better data management from practical aspects. It aims at larger projects with considerable contributions from bioinformatics.

Organizers

- Celia van Gelder (ELIXIR-Netherlands)
- Mateusz Kuzak (ELIXIR-Netherlands)
- Roland Krause (ELIXIR-Luxembourg)
- Brane Leskosek (ELIXIR-Slovenia)

Target audience

Researchers and bioinformaticians supporting researchers in making Data Management Plans.

Preparation

- For those participants who have their own DMP please bring that along for use in the interactive session.
- For participants that do not have their own DMP yet please bring your description of your research project.

Agenda

1. Introductions and scoping. Presentation how to use ELIXIR-SI e-Learning Platform (EeLP) (Marko Vidak, ELIXIR Slovenia)
2. Experiences from ELIXIR-Luxemburg (Roland Krause, ELIXIR-Luxemburg)
3. Capacity / skills building & Training in Data Management & Stewardship (Celia van Gelder, ELIXIR-Netherlands)
4. Hands on experience with the [Data Stewardship Wizard](#) (Mateusz Kuzak, ELIXIR-Netherlands)
