Who is Thanos?

Thanos was a warlord from Titan. He is said to be born between 1013 and 1018. His unfortunate death happened two ways. He was defeated in mid 2018, and again when he travelled in time (October 2023). He has two daughters, Gamora and Nebula.

His main objective was to bring stability to the universe, as he believed its massive population would use up the universe's entire supply of resources and condemn it. To complete this goal, Thanos set about tracking down the infinity stones, as combined efforts might wipe out half of the universe.

Thanos set out on his own ferocious crusade to get the infinity stones back into his possession. He fought in many wars, causing many unnecessary deaths. Thanos truly believed, and had his heart set on retrieving the infinity stones, that it caused him to do awful things, especially to his daughters.

Many believe that he's a man angry with working hard to scrape a living while the very people responsible for creating death and destruction profit from cleaning up the mess afterwards.

Thanos had to join forces with the Avengers, and other superheroes, at some point to undo his actions. But alas, Thanos became the villain again.
