

## Topics

- create Marketplace entry for VIATRA
- pre-built Eclipse configurations for download
- how to advertise our UML support? blog post?
- Error reporter config
- Xcore integration
- UI feature description cross-check

## Minutes

### EQ

- Tomi: created feature for Debugger view, weird compiler errors from Eclipse Hudson, needs further investigation
- Xcore build is currently not working, needs to be fixed (separately from the debugger build problem)
- everyone: please help with testing and UI spec effort:  
<https://wiki.eclipse.org/EMFIncQuery/DeveloperDocumentation/FeatureSetAndTesting>
- Automatic error report: now works well with Mars and EQ:  
<https://dev.eclipse.org/recommenders/committers/confess/#/projects/54c12458e4b09f7fc8453997>
- UML support: new and noteworthy updated, wiki page available at:  
<https://wiki.eclipse.org/EMFIncQuery/UMLSupport>
  - TODO Uzi This page needs to be extended with profile support for the generated case
  - TODO Dini Create a short blog post to IncQuery.net with a small live validation/UML example

### VIATRA

- TODO DavidIstvan create Marketplace entry for VIATRA
- Eclipse bundle: deferred to future
- VIATRA project website: waiting for Uzi, DavidIstvan will help
- TODO Nasz: please report wrong package location to the mailing list
