[Free Quiz] How “Electro-Polluted” Is Your Home?

Is Your Home Buzzing With Toxic EMFs?

Zapped with toxic EMFs at home?

EMF Quiz - Is your home electro-polluted?

Is your home an EMF hazard?

Hey [First Name],

Did you know that the EMF radiation emitted by smartphones and those huge cell towers are a Class 2B carcinogen? It’s crazy how no one talks about this...

The fact is that exposure to this type of “electro-pollution” has now been linked with sleep problems, fatigue, depression and much more.

But the worst part is that most people’s homes are actually MORE “electro-polluted” than the outside environment.

What about yours?

==> **Take this quiz and discover how electro-polluted your home is.**

The good news is that most people start sleeping better and feeling healthier when they apply just a few of the low-EMF action steps you’ll learn about right after the quiz.

Here’s to making your home a healthier place to live in!

EMF Quiz - Is your home electro-polluted?

Is your home an EMF hazard?

Hey [First Name],

Did you know that the EMF radiation emitted by smartphones, wifi and Bluetooth gadgets are known to disrupt sleep and keep you feeling fatigued in the morning?

If you are not experiencing great, restorative sleep, then it might be because your home is filled with this “electro-pollution”.

To discover how electro-polluted your home is (and what to do about it!), take this brand new quiz:

==> Quiz: How Electro-Polluted Is Your Home?

The good news is that most people start sleeping way better once they apply just a few of the low-EMF action steps you’ll learn about right after the quiz.

[Free Webinar] Is 5G Really Dangerous?
[Free Webinar] The Truth About 5G Dangers
3 Myths About 5G & “Electro-Pollution”
5G dangers?

The new “5G” (5th generation) cellular networks have been all over the news lately, stirring massive controversy.

Some claim that the “electro-pollution” (EMFs) emitted by all these new cell towers can lower your immunity, sap your energy levels, and interfere with your sleep. But on the contrary, some claim these invisible signals are completely safe.

So who’s right? Should you be concerned about 5G, or worry about how it might impact your health?

My colleagues Brian Hoyer and Nick “The EMF Guy” Pineault have put together **an educational webinar** this Monday which will answer all of these questions and help you see things more clearly.

The best part? It’s 100% free, and you’re officially invited:

==> [Free Webinar] 3 Troubling Myths About 5G & Electro-Pollution (+ how to protect yourself)

Here’s why I’m so excited about this information...

Nick & Brian have been studying EMFs for *years*, and have put together some of the most current and research-based information on 5G and electro-pollution available *anywhere*.

You can feel good about the fact that the information they’ll share is based on *independent* science, and stays far away from fear mongering or “theories”. Their goal is to educate and empower you, not to stir even more fear in these already-stressful times.

If you want to learn everything you need to know about 5G and electro-pollution and learn some of the ways you can protect yourself against the health impacts, make sure to watch it right away:

- Still overwhelmed about EMFs? (solution inside)
- Are You Wasting Money On Bogus EMF Solutions?
- Still confused about EMFs & 5G? Here’s the fix.
- Concerned about 5G?

A lot of people are waking up to the fact that the so-called “electro-pollution” (EMFs) emitted by phones, wifi or Bluetooth gadgets is a new type of environmental stressor that we should all know about.

The truth is that our global exposure to this new toxin has been steadily increasing, and with 5G it’s only getting worse.

And while minimizing your exposure to *food* toxins is fairly simple -- just eat more organic food... minimizing your exposure to EMFs is tricky:

“EMF-harmonizing” chips that you stick on your phone... dirty electricity filters... EMF-blocking clothing... EMF detection meters... Which of these solutions actually work?

It’s true that reducing EMFs can seem overwhelming and confusing at first -- but the good news is that it does not have to be this way.

My colleagues Nick “The EMF Guy” Pineault and top EMF mitigation specialist Brian Hoyer have teamed up to create the perfect solution to help you clean electro-pollution right out of your home.

It’s called... “The Electro-Pollution Fix” -- an easy, step-by-step EMF Protection Course that’ll help you and your family dramatically reduce your exposure without breaking the bank.

Electro-Pollution Fix

Subject lines:

- The #1 thing you can do about 5G
- The truth about 5G
- Is 5G more dangerous than wifi?

Have you heard about how bad these new “5G” networks might be?

5G -- the fifth generation of wireless networks -- is all over the news these days, and for a good reason: This untested new technology will require the installation of one new EMF-blasting cell antenna every 3 to 12 homes!

But here’s the honest truth about 5G, and where most people get it wrong...

No matter if 5G antennas are being installed in your neighborhood, bathing you in EMFs 24/7, the EMFs you’re getting from your own phone, wifi router and other devices at home **STILL MATTER.**

In fact, here’s the craziest part: In a lot of situations your own wifi router at home might expose you to *more* EMF radiation than a nearby cell phone tower!

The #1 thing you can do to stay healthy in a 5G world is to minimize your exposure from all the other G’s: 2G, 3G, 4G, LTE, your cell phone, tablets, computers, Bluetooth devices, wifi routers, smart meters, and anything that emits what we should really call “electro-pollution”.

Now you can see why I’m so excited about the new “**Electro-Pollution Fix**” course that my friends Nick Pineault and Brian Hoyer launched recently.

Their course is really the first that focuses *not* on theory -- endless scientific studies, theory and technical jargon -- but instead gives you an easy, step-by-step approach to minimizing your EMF exposure.

Here’s a fraction of what their course will teach you:

- **Module 1:** The 5 different types of EMFs that can impact your health
- **Module 2:** How lighting your home the right way can impact your overall health

- **Module 3:** Identifying and combating the most important sources of wireless radiation (often hidden in plain sight)
- **Module 4:** How electrical fields prevent you from sleeping soundly and impact your wellbeing, and what to do about it
- **Module 5:** Avoiding magnetic fields, which have been classified as a Class 2B carcinogen since 2002 and linked with childhood leukemia
- **Module 6:** Fighting *outside* sources of EMFs: 5G, cell towers and much more!

I'm very impressed by what Nick and Brian have put together. This is really the most complete solution available *anywhere* to help you minimize EMF stress for you and your family, take care of your health and feel empowered knowing you are well equipped to face future technologies that are coming your way.

- EMFs & your health: What's the truth?
- The real truth about EMFs
- Is your home still filled with EMFs? (the solution)

Hey,

A lot of people know very well that EMFs from cell phones, Wifi routers, cell towers and Bluetooth gadgets are a toxin everyone should avoid as much as possible... but still feel confused or overwhelmed about what they can actually DO to reduce their exposure.

Sounds familiar?

With so many solutions out there, ranging from EMF chips and pendants to shielding materials, to EMF meters and tech accessories... How can you avoid wasting a ton of time and money?

My colleagues Nick Pineault and Brian Hoyer teamed up to create the ultimate **Electro-Pollution Fix -- a simple, step-by-step EMF Protection course which will teach you...**

- Exactly what to do first to reduce your EMF Exposure as much as possible without investing a ton of money and time (it's all outlined in a step-by-step, simple manner)
- How to get your skeptical spouse, kids or coworkers on board with the idea of EMF reduction and safe tech use
- What EMF-blocking tools (phone cases, blankets, etc.) are actually worth it, and which to avoid like the plague
- The basics of EMFs, made easy to understand -- for example, the important difference between wireless radiation, magnetic fields, electric fields and dirty electricity (no more confusion!)
- How to find out if EMFs are causing or worsening one of your everyday symptoms, or affecting someone in your family (most people are actually EMF sensitive)
- What EMF meters are worth it for beginners, and help on how to use them
- And much, much more...

If you want to clean up your home from all this toxic EMF pollution and help your entire family thrive, this course is simply the best way to get started:
