

# Title of The Paper in Bahasa Indonesia (Arial, 14pt, Bold, Capitalize Each Word, Centered)

## Title of The Paper (Arial, 14pt, Bold, Capitalize Each Word, Centered)

First Author's name<sup>1\*</sup>, Second Author's name<sup>2</sup>

<sup>1</sup>Name of Department, Name of Faculty, Name of University, Address, City, Country

<sup>2</sup>Name of Department, Name of Faculty, Name of University, Address, City, Country

\*E-mail: [xxxxxxxx@xxx.ac.id](mailto:xxxxxxxx@xxx.ac.id)

### Abstrak

Abstrak is written in Bahasa Indonesia. Author names must be given in full, with surnames (family names). Where names may be ambiguous (e.g., a double name, or possible confusion about first/last names), please indicate this clearly. Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript number immediately after the author's name and in front of the appropriate address. Author addresses must be given in English in the following order: Department, Faculty, University, City, Country, with numbers in superscript after each author name to indicate his/her address.

**Kata Kunci:** kata kunci 1, kata kunci 2, kata kunci 3 (please enlist 3-6 kata kunci atau frase)

### Abstract

*A concise and factual abstract, which is structured, is required. The abstract is limited to 250 words or less for research and review article. The abstract should state briefly the introduction (1-2 sentences), the purpose of the research, the methods, the principal results and major conclusions. An abstract is often presented separately from the article, so the text should be comprehensible when read alone. For this reason, references should be avoided. The use of numbers in the abstract identifying compounds, formulas, tables or references and non-standard or uncommon abbreviations should be avoided. Each submission must be accompanied by a minimum of three to six keywords that reflect the scientific content of your manuscript for subject indexing at the end of the abstract. The keywords should be listed in full without abbreviations. Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible.*

**Keywords:** key word 1, key word 2, key word 3 (please list 3-6 keywords or phrases)

### PENDAHULUAN (INTRODUCTION)

In this section, the authors should state the objectives of the work, define the scope of your paper, summarize relevant work to the study being reported and provide an adequate background. Paper should be written concept base, theoretical, experimental and empirical. A detailed literature survey or a summary of the results should be avoided. It should not be a review of the subject area, but should finish with a clear statement of the question being addressed. The introduction must be designed to inform the reader of the rationale and significance of the study.

All registered submitted papers will be blind peer reviewed. Please write your paper in good English/Bahasa Indonesia. The length of the full paper should preferably be between 10 to 15 printed pages. The full paper should be on A4 paper size.

### METODE PENELITIAN (RESEARCH METHODOLOGY)

#### Subheading 1

Heading has the following characteristics: Boldface, Uppercase. Leave 1.0 spacing before beginning a new head. Divide your Full Paper into clearly defined sections. Each heading should appear on its own separate

line. The title of each section or subsection should be bold.

### **Subheading 2**

Sub-heading has the following characteristics: Flush Left, Capitalize Each Word.

## **HASIL DAN PEMBAHASAN (RESULT AND DISCUSSION)**

Results should be clear and concise. Text, tables and figures must show minimal overlap, and must be internally consistent. Tables and figures should be designed to maximize the presentation and comprehension of the experimental data. Attention should be paid to the matter of significant figures. The same data should not be presented in more than one figure or in both a figure and a table.

The Results and Discussion sections should be combined. Avoid extensive citations and discussion of published literature. The purpose of the discussion is to interpret significance of the results and to relate them to existing knowledge in the field in as clear and brief a fashion as possible. Information given elsewhere in the manuscript should not be repeated in the discussion. Extensive reviews of the literature should be avoided.

Please submit tables as editable text and not as images. Tables should not be placed next to the relevant text in the article. They should be given on separate page(s) after the references. Number tables consecutively in accordance with their appearance in the text and place any table footnotes below the table body. Table headings should be given above the table and written in sentence case. Be sparing in the use of tables and ensure that the data presented in them do not duplicate results described elsewhere in the article. Please avoid using vertical rules.

All artworks, figures, images, illustrations, graphics, photos, pictures, plots and schemes should be labeled as Figures. Figures should not be placed next to the relevant text in the article. They should be

given on separate page(s) after the references. All tables and figures must have a caption and/or legend and be numbered (e.g., Table 1, Figure 2), unless there is only one table or figure, in which case it should be labelled "Table" or "Figure" with no numbering. The font used in the figures should be Times New Roman, 10pt, Bold.

All tables and figures must be numbered consecutively as they are referred to in the text. Please refer to tables and figures with capitalisation and unabbreviated (e.g., "As shown in Figure 2...", and not "Fig. 2" or "figure 2").

To ensure the highest print quality, your figures should be submitted in either TIFF or JPEG format at the highest possible resolution (300 dpi or higher).

Use the references manager, for example, Mendeley, Zotero, Endnote (Harvard style). References cited in the manuscript must be followed by the author's last name and the year of its publication. In case the authors of the cited references are more than two people, it should be written with 'dkk.' (in Bahasa Indonesia) or 'et al.' then followed by the year.

References/bibliography are listed alphabetically.

## **KESIMPULAN (CONCLUSIONS)**

The main conclusions of the study should be presented in a short Conclusions section, which stands alone. You should explain whether your findings supported your hypothesis. Avoid using references in conclusion section.

## **UCAPAN TERIMA KASIH (ACKNOWLEDGMENTS)**

Please keep any acknowledgements brief, and don't include thanks to anonymous referees and editors, or any effusive comments. You may acknowledge grant or contribution numbers.
