We are in the middle of a **global inequality crisis**. **COVID-19 has made this worse** - the vaccine inequality divides even more. We need a strong people's voice for global justice. Civil society including representatives from organisations of women, youth, older persons and marginalised people from all over the world will come together in the Global People's Assembly. They bring the perspectives from communities - including from People's Assemblies organised in 30 countries. The participants will prepare a declaration, which will be presented to the governments at the UNGA and the UN leadership.

You will find the **Programme of the People's Assembly below** this email (and attached), and also the list of the 29 co-organisers - global networks and constituency groups.

Please share this invitation with your members and partners to **form a strong people's voice Programme**
