Sneak past censorship with this trick

Yo dude,

I don't know about you but I grew up watching Toy Story movies and my favourite character was Buzz Lightyear.

Even though pork and alcohol are sold in my country despite being islamic, the movie Buzz is completely banned here.

The controversies surrounding the movie and the banning only makes me want to see it more.

They made Buzz gay? Are two male cartoons going to kiss? Can't you just look away for a second? Or have a toilet break at that scene?

These were festering in my mind and I NEEDED to see that movie.

Most ways to get around the censorship range from sketchy to borderline illegal. (They might steal my bank savings and I would be thrown in jail.)

Except for this one. I saw many movie fans trying this out with success.

All you have to do is install this program on your PC and fly thousands of miles to London in just a click at the comfort of your home.

Spoiler Alert: the movie wasn't that gay that it cut out to be.

Plus I got a whole lot of new recommendations for my next watch.

Check it out here <link>

Don't get left out from the buzz that comes from watching this.

Talk to you soon, Bye!
