Krown Network

Krown Network Announces Pre-Sale Launch of Sovereign (SVRN)

Pre-sale begins 13 December – Don't miss your chance to join the movement.

London, 13 December — Krown Network is proud to introduce Sovereign (SVRN), an exciting cryptocurrency designed to make DeFi more accessible, faster, and secure for everyone. The pre-sale will begin on 13 December; early supporters are invited to be part of something groundbreaking!

What separates Sovereign is its dedication to meeting the real-world challenges facing modern crypto users. Its **HyperLedgerX technology** handles up to 100,000 transactions per second - no waiting around necessary! **Quantum resistance** protects from future technological risks while working seamlessly with Ethereum, Binance Smart Chain, Solana, etc. And its Eco-friendly **Proof-of-Stake 3.0** uses 89% less energy than older systems!

Technology aside, this project aims to make crypto more accessible and rewarding - you may even gain dynamic staking rewards just by holding onto tokens!

Pre-sale tokens will be available at £0.12 each; to secure your spot early, visit www.krown.network.

About Krown Network

Based in London, Krown Network is at the forefront of blockchain innovation, creating solutions that drive decentralisation and sustainability.
