Re: Vehicle Surplus

In a continued effort to remove old waste SPS Facilities is looking to surplus the following vehicles from our fleet. All of these vehicles have been out of use for at least three years and are taking up space at our Central Office or Oak Ridge Maintenance shop. The vehicles were taken out of rotation when they were deemed unsafe or unable to pass inspection and the cost for repair was worth more than the vehicle. The two trailers were moved during the closing of the Wing School but have not been used in over ten years. All of the equipment will be removed at no cost to SPS and any funds received from scrap will be used toward current vehicle maintenance.
