

## What are the pros and cons of nuclear energy?

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Class: \_\_\_\_\_

After reading the article or viewing the video: Compose a “big question” that invites interpretation, discussion or argument (i.e. not a factual recall or yes/no question). After papers are exchanged, choose a question and provide an answer in the space provided (if an answer has already been provided, you can add to the answer). THEN write down another question. Repeat this process for each paper you receive until you get your original paper back. Then review all questions and answers on your paper. In the space at the bottom, write your response to the reflection question provided by your teacher.

Question 1:	Question 2:
Answer/Comment	Answer/Comment
Question 3:	Question 4:
Answer/Comment	Answer/Comment
