RECENT PROFESSIONAL EXPERIENCE

Google, Mountain View CA. October 2017 — Present

Web Developer

Google Store Team | store.google.com

Apple, Inc. Cupertino CA. March 2017 — September 2017

UI Developer

Apple Product Documentation (APD) department creates and delivers instructional content for all Apple hardware, software, and services. Content is delivered in a variety of form factors and through many channels - in Siri, via Spotlight search, via Tips app in iOS, as ePubs through iBooks Store, on the web at help.apple.com, via HelpViewer app on Mac OS X, and as printed quick start pieces that are shipped in boxes together with hardware.

- Worked as a developer on Quick Tours for all new MacBooks and iMacs. These tours are experienced upon starting up your computer for the first time. Software tours are viewable from the Help menu in each application.
- Technology utilized: Riot.js, Ember.js, Vue.js, Node.js, and SCSS animation.
- Focused attention to usability and accessibility of web technologies.
- 10's of millions of annual viewers for the work I produced.
- Published an npm package for internal use at npm.apple.com with Node.js and Express.js.
- Wrote shell scripts for workflow automation.
- Agile project workflow.
