

Milestone Deliverable Review Report

Deep Funding Round: 3

Project code: DFR3-RFP7

Project title: Bringing Network Pharmacology To OpenCog Hyperon

Milestone number: 2

Milestone deliverable:

<https://drive.google.com/drive/folders/17z166HdL7do0MnDB0poWfm0Jp9d693Pe>

Date: 26/10/2024

Status: Accepted

Feedback (Why accepted, why rejected?):

The source code provided in the GitHub repository demonstrates milestone deliverables, including subpackages for task management, ETL workflow steps, a base class for knowledge graphs (KGs), and a subpackage specifically for biomedical KGs.

Additionally, messages from the Mattermost knowledge graphs channel, spanning from December of last year to August this year, were shared. These discussions focused on KG representations, particularly biomedical knowledge graphs. The report on Biomedical knowledge graphs includes examples, resources, a shared representation, and encoding techniques in MeTTa, with links to support related surveys, explanations, and evaluations.

If rejected, suggested changes:
