Slug: (none provided)

Primary Keyword: Emface

Meta: Rediscover your natural radiance at Evexia Medspa. We offer Emface, a new non-invasive facial treatment that uses RF and HIFES energy to tone the face.

Non-Surgical Face Tightening with Emface | McLean, VA (H1)

BTL's recent invention, Emface, is leading the charge in non-invasive facial contouring. As the first treatment of its kind, Emface offers a needle-free, surgery-free solution to lift and tone the face. Say goodbye to wrinkles and hello to a rejuvenated, radiant complexion.

This innovative treatment is suitable for men and women and requires minimal downtime and recovery. Experience the transformative power of Emface at Evexia Medspa in McLean, VA. Book your free consultation by calling (571) 554-5418.

Why People Love Emface (H2)

Emface is revolutionizing the world of facial contouring with its use of radiofrequency and electromagnetic stimulation. It's effective for reducing the appearance of wrinkles and fine lines. Additionally, it stimulates collagen and elastin production for a youthful, radiant complexion.

Despite it being a new facial toning solution, it's already garnered a loyal following among men and women for its impressive list of benefits:

- FDA-cleared as safe and effective (H3)
- Provides fast, natural-looking results (H3)
- No needles or chemicals (H3)
- Plumps and lifts sagging skin (H3)
- Minimal downtime (H3)
- Quick 20-minute sessions (H3)

Emface Before and After* (H2)

See Emface's incredible potential with our patients' before and after photos. They showcase the remarkable results possible with this non-surgical facial toner. Each person experiences tighter, more toned, and refreshed faces. Their profiles look more defined, and the skin is plump and healthy.

As with any aesthetic treatment, individual results may vary.* Get the best outcome for your unique skin needs by trusting the skilled team at Evexia Medspa for your Emface treatments.

INSERT BAS

How Emface Works (H2)

If you've always wanted a way to lift and tighten your face without needles or surgery, Emface could be the answer. This innovative treatment uses radiofrequency energy to smooth out wrinkles and provide a subtle lift. It also relies on HIFES technology, which stimulates collagen and elastin production to promote healthy, youthful-looking skin.

Emface Treatment Applications (H2)

Emface targets signs of aging across the entire face:

- Chin
- Eyebrows
- Eye area
- Neck
- Jawline

Whether you're concerned about crow's feet, sagging skin, or a lack of definition, this comprehensive treatment can help.

Emface Results* (H2)

Many of our clients love the amazing results they've achieved with Emface. Some have even noticed improvements in their skin after just one treatment! On average, clients experience:

- 23% more facial lift for a youthful appearance

- 26% more elastin and collagen for improved firmness
- 30% more facial muscle tone
- 37% fewer wrinkles

While some patients see optimal results after four cycles, it may take up to 12 weeks of consistent treatments to see the full effects. Personal results may vary.*

Emface Cost (H2)

The cost of Emface may differ depending on various factors, including your cosmetic goals, age and skin condition, and the area(s) you wish to treat.

Evexia Medspa offers \$250 off for new clients to help make the treatment more affordable. In addition, hassle-free payment plans are available to help you achieve luminous skin.

Get a personalized estimate for Emface by visiting our office or calling (571) 554-5418 to schedule a consultation. Our team is happy to assess your skin needs and craft a customized treatment plan that fits within your budget.

Emface FAQs (H2)

Is Emface Better Than a Traditional Facelift? (H2)

Emface is a game-changer for those who want to enhance their look without the pain, scarring, and long recovery time of traditional facelifts. It is a non-invasive treatment that requires no anesthesia, needles, or toxins. You don't have to worry about scarring.

In contrast to traditional facelifts, which can take hours to complete, Emface sessions are quick. Overall, Emface is a safe and effective way to tone and lift your face, giving you the confidence to show off your natural beauty.

How Long Does an Emface Session Last? (H2)

An Emface treatment lasts about 20 minutes. Since it's short, you can schedule it during your lunch break on any busy day. During the session, you can expect to feel a soothing facial muscle massage accompanied by a warm sensation. We recommend at least four treatments spaced a week apart for the best outcome.

When Do Emface Results Start to Show? (H2)

Emface is known for delivering stunning improvements after a single treatment. But most patients see dramatic changes within 6-12 weeks of beginning their treatment course. While results vary for everyone, Emface is a powerful tool for achieving a glowing complexion. Bear in mind that everyone is unique. Some may need more time to enjoy the full treatment benefits.

Can I Use Emface as an Eye Lift? (H2)

One of the greatest perks about Emface is that it's customizable. This means you can treat your eye area. With Emface, many patients have been able to achieve a lateral eye lift without pain or surgery.

Can I Use Fillers With Emface? (H2)

Emface and fillers can be a dynamic duo when it comes to enhancing your appearance. But it's crucial to consult with an expert to ensure you can safely incorporate both treatments into your beauty routine.
