

DATA-01-04 proposal

Minutes meeting 22-03-15

Agenda

Agenda	1
Attendees	1
Addressed topics	2
Base documents	2
Next steps	2
Use Cases	3
Potential new partners (beyond those required for use cases)	3
Current consortium	3
AOB - Any Other Business	3
Resources	3

Attendees

Name	Organization	(Y/N)
Juanjo Hierro	FIWARE Foundation	Y
Alberto Abella	FIWARE Foundation	Y
Davide Dalle Carbonare	Engineering	Y
Roberto Di Bernardo	Engineering	Y
Martino Maggio	Engineering	Y

Sylvie Le guyader-colliot	Atos	-
Cyrille Sauvignac	Atos	-
Clara Pezuela	Atos	Y
Ali Muhammad	European Dynamics	Y
Alkiviadis Giannakoulis	European Dynamics	Y
Francisco de la Vega	FICodes	Y
Álvaro Arranz	FICodes	Y
Jesús Ruiz	Alastria	Y
Luis Muñoz	University of Cantabria	Y
Joaquin Salvachúa	UPM	Y
Álvaro Alonso	UPM	
Xabi Chao	FundingBox	Y
Dennis Wendland	FIWARE	Y

Addressed topics

Base documents

A first version of [overall vision and approach for the proposal](#) has been produced. This document is a summary we can share with potential partners we may invite to join the consortium. **Please don't modify or edit this version unless you detect a typo or an error** since a link to it will be shared with people outside the consortium.

A shared [list of contacts](#) spreadsheet has been created. Please review (add people missing, provide company acronym, delete people we should not add to mailing list).

A [shared budget and basic partner info spreadsheet](#) is also available where partners should also add their company data.

A [slidedeck](#) was created where we captured an initial discussion of the analysis of the call text.

Next steps

A mailing list will be created. We will add people in the [list of contacts](#) by tomorrow noon and they will start receiving mails so it is important that you drop from the list of contacts the people who are not really going to be involved and add those who may be missing.

Working meetings have been planned. Timeslot select has been 08:00am to 09:00am which

worked pretty well for DOME. Next meeting will be this Thursday.

Juanjo will bring a template for the proposal splitted in different files on Thursday.

Use Cases

As mentioned in the call, projects should materialize data spaces and they “should be of realistic scope and size, deployable in real-world applications, in various application areas.”

In order to initiate the discussion, we bring the following ideas from the base document (note that we should choose data spaces that may help us to address cross-data spaces exchanges):

- Smart living - covering scenarios of the daily life of citizens, connecting smart cities with smart buildings (e.g., stadiums, malls, hospitals), smart transport systems (train services/stations, air lines/ports, ...)
- Farm to Fork - covering the whole food chain from the farm to the end consumer
- Factory to consumer - covering the production and supply chain of manufactured products

Potential new partners (beyond those required for use cases)

Potential partners:

- IDSA and/or Gaia-X
- iSHARE Foundation
- Nico AG (specialists in IDS ODRL)
- eGroup (payment gateway)

Current consortium

- FIWARE Foundation
- Engineering
- Atos
- European Dynamics
- FICodes
- UPM
- University of Cantabria
- Alastria

AOB - Any Other Business

No AOB. The meeting closed.
