

Publishing eu.communityovercode.org

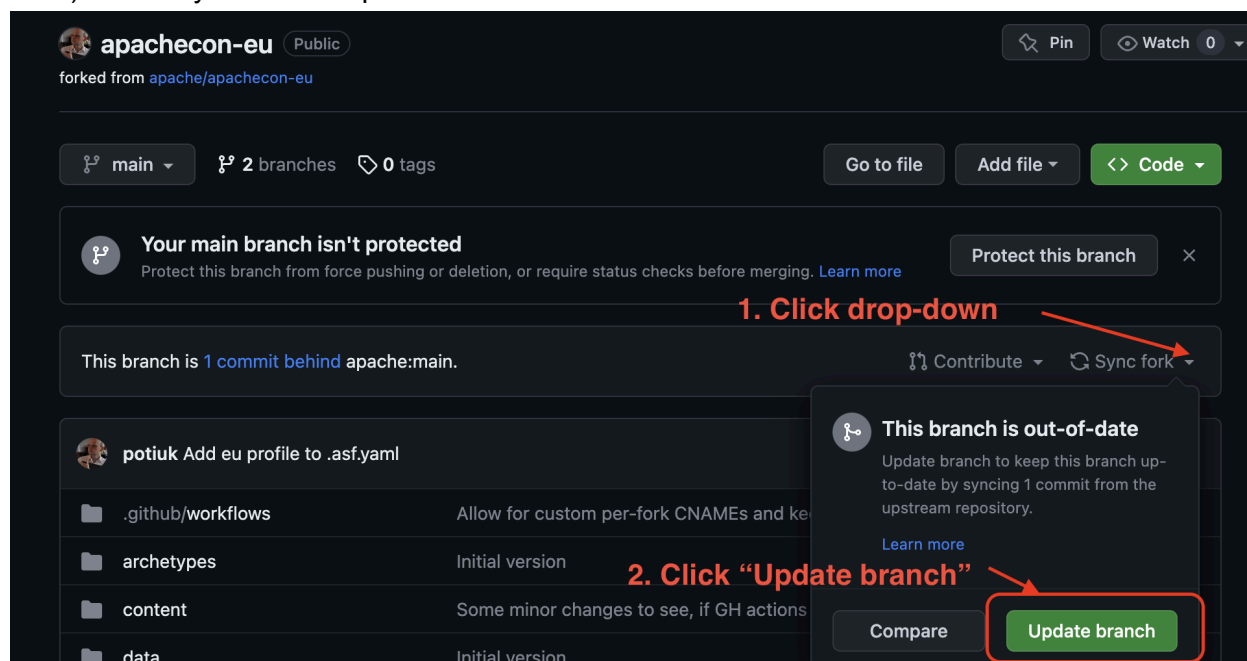

This is a (very short) guide on how to publish changes to **eu.communityovercode.org**:

1. Push changes to the Staging

- Push your changes to main branch of <https://github.com/apache/apachecon-eu> (or merge PR)
- In <https://github.com/apache/apachecon-eu/actions> you will see an action running. When it gets green, the change should be published (usually takes < 1 minute). When it gets red 🤖 in the slack #community-over-code-eu in the ASF Slack: <https://the-asf.slack.com/archives/C04FPJQCP7F>
- your change should be live at <https://apachecon-eu.staged.apache.org/>

2. Promote changes from Staging to Production

- Go to: <https://github.com/potiuk/apachecon-eu>
- Click Sync-fork -> Update branch:

- In <https://github.com/potiuk/apachecon-eu/actions> you will see an action running. When it gets green, the change should be published (usually takes < 1 minute).
- your change should be live at <https://eu.communityovercode.org>
