Digital Mihi/Pepeha

Students research then create digital versions of their pepeha to share or research and collate information about their identity and culture. Video: The Importance of Pepeha.

Once the pepeha is completed they could share the links to the information via a blog (eg Blogger or Seesaw public blog) or class/school website, Facebook page etc. They could also create a QR code linked to their info and share this on blogs, websites etc. Check with local iwi on correct tikanga for your area.

Māori ki Otāgo Mihimihi/Pepeha

Korero Māori NZ mihimihi

Mihi Whakatau - Caritas

Google MyMans

The learner knows the teacher and the teacher knows the learner: **Whanaungatanga** Using and showing respect for Maori tikanga and contexts for learning:

Tangata Whenuatanga and Manākitanga

If shared with whanau then also Wananga

If taking ownership of their own learning and/or supporting the learning of others **Ako** Incorporates **Kotahitanga** and **Rangatiratanga**

Add pins to a map representing significant places in their mihi/pepeha eg. maunga, awa, place of birth etc. Google MyMaps - use class account. http://royalhynesight.blogspot.co.nz/2013/08/a-modern-slant-o-n-traditional.html The process is slightly different now but easy to do. You can add photos, text and video to the pin.	Example 1 Example 2	/Modification Or if shared on Seesaw or website with comments invited then Modification
Create and edit movies: Movie Creation tools: Camera iPad or phone camera Green Screen by Do Ink - A ipad app for green-screening. Paid app, ~\$3 Veescope - Greenscreen app - freemium greenscreen app Explain Everything, Show Me or Educreations can also be used to create videos. Screencastify - record your screen or record yourself using your Desktop/laptop/Chromebook camera. Free Chrome browser extension, saves to Google Drive. Direct add to Youtube if required.Can trim from either end of the video. 5 minute limit in the free version. Loom is another similar tool. Seesaw video tool - record themselves then share on the Seesaw blog Puppet Pals app - free or paid versions (about \$6) can be used to create videos using puppets. The paid version allows you to add your own backgrounds and characters or you can use the ones in the app. Very easy to use.	Example 1 Melville Intermediate Example 2 Melville Intermediate Example 3 using still photos and voiceover. Pt. England Example 4 Photobooth	Modification Or if shared on Seesaw or website with comments invited then Redefinition

Example 1

Augmentation

- <u>ChatterPix Kids ipad app</u> very simple to use for younger students - Take a photo of themselves draw a mouth and record themselves talking.
- Zoom can be used to make videos as you can record a meeting. Free version is limited to 40 minutes. Some devices will allow you to use a virtual background.

Movie Editing tools:

imovie - ios and Mac Comprehensive video editor, The iPad version has less features than the Mac version. Both Mac and iPad versions have a green-screening facility.

- Moviemaker PC but no longer available. The Windows 10 photos app allows some editing of video
- Youtube editor Very basic editor. Enables you to trim the ends of your video, add audio, titles and some filters.
- Adobe Spark
- Filmora has a watermark in the free version
- Wevideo has a limited free version and a comprehensive paid version is available

Making Digital Mihi/pepeha - the process (not the technology but the teaching & learning)

Teacher discussing benefits of digital mihi/pepeha

Coding. Gamefroot - visual mihi maker http://make.gamefroot.com/games/new

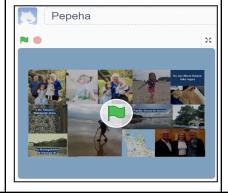

Sign in (with Google) then on opening pop up screen scroll to find Mihi maker tutorial. This has potential but I have found it a bit buggy.

See this video for how it should work.
