

● Sending MaidSafeCoins with Omniwallet

Disclaimer:

This is not a complete tutorial for Omniwallet (<https://test.omniwallet.org/>)

Omniwallet is still a work in progress, please read the onsite included disclaimer as well.

Known Issues:

The issues detailed below are known and reported (issues [#401](#) , [#397](#)).

History for sent MaidSafeCoins doesn't currently show in Omniwallet (issue [#402](#))

Also, do not use Omniwallet with Firefox as sending fails with an error.

Due to a known unit conversion issue with Omniwallet, and MadeSafeCoins being indivisible, sending them can be a bit tricky. Here's a short guide on that.

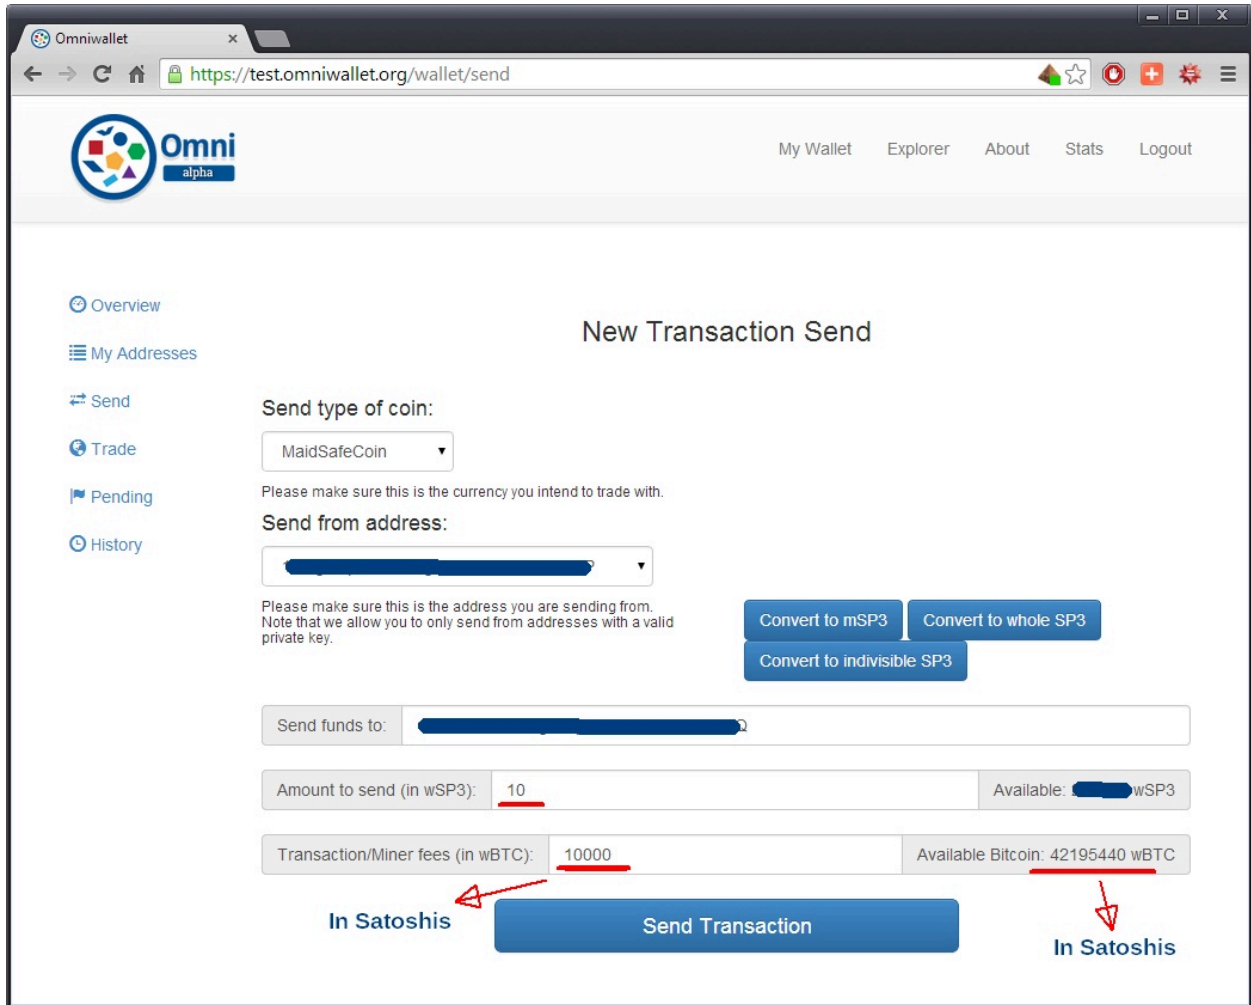

New Transaction Send

1. When filling the form for sending MaidSafeCoins the “**Convert to indivisible SP3**” button should be clicked.

2. After #1, the correct amount of available (per selected address) whole units of MaidSafeCoin is displayed. Fill the amount to send accordingly (correct amount).

3. Currently (after #1), the display of available (per selected address) whole units of bitcoins is wrongly displayed in Satoshis (ie. times 100,000,000). Accordingly, you should fill the fee amount in Satoshis, i.e. 10,000 for 0.1 mBTC (hence the pre-fill hint “10000 minimum”).

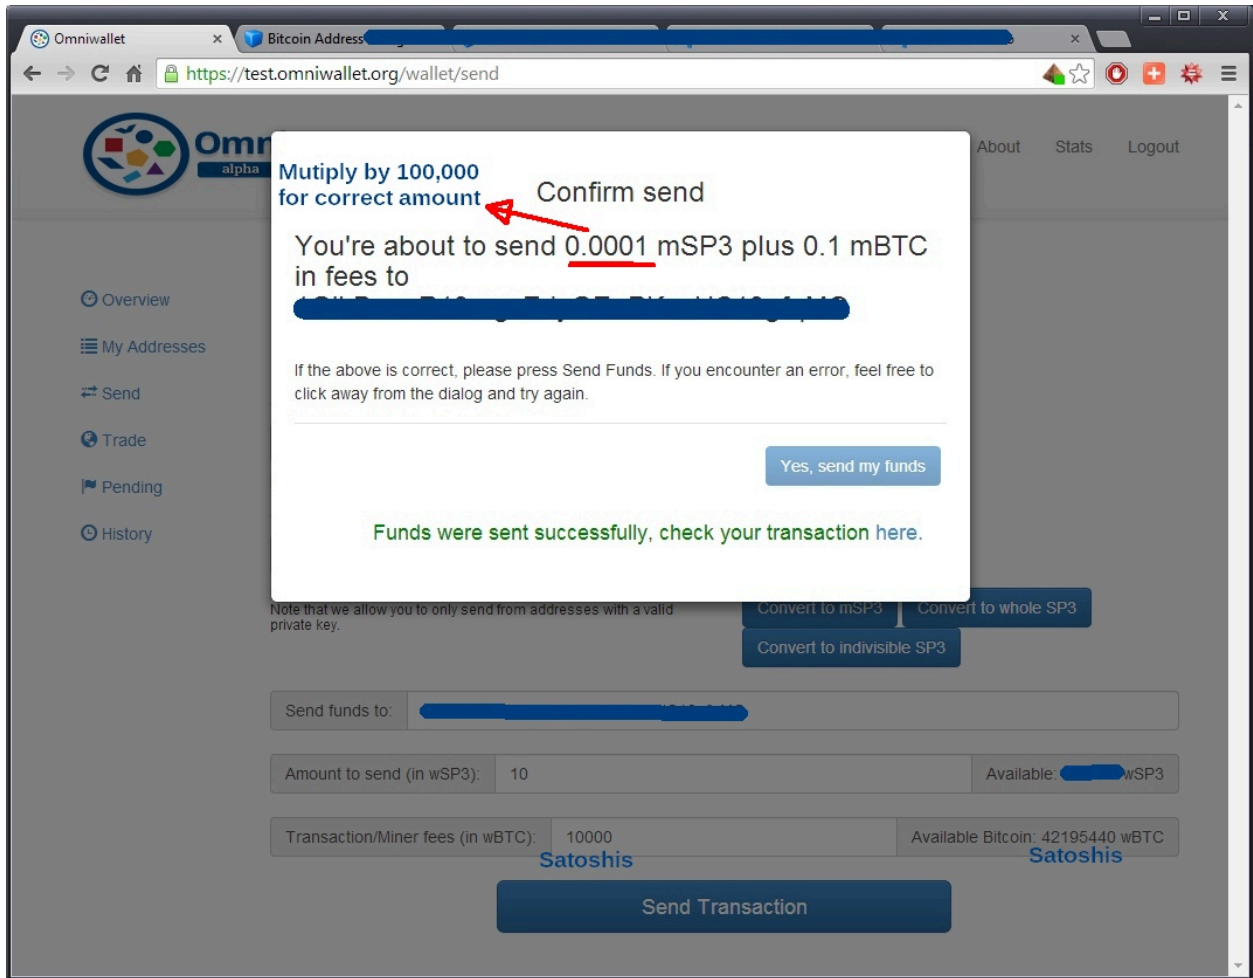

See image below:

Confirm Send

In the confirmation dialog again there is a display conversion issue. This time the BTC fee amount is correct but the MaidSafeCoin amount is incorrectly displayed as divided by 100,000.

See image below:
