

Akvelon Inc.

Position: Senior Backend Software Engineer

About us

Akvelon Inc (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

About project

A global technology giant has played a pivotal role in influencing cloud technologies, particularly through its leading cloud platform, Azure. Azure has become a cornerstone, offering a comprehensive array of services spanning computing power, storage, artificial intelligence, and more. Its impact is evident in how businesses worldwide, irrespective of size, have been empowered to embrace the scalability and flexibility of cloud computing, thereby fostering innovation and enabling digital transformation.

Presently, the Azure Team is actively seeking a backend software engineer to contribute significantly to the development of essential platforms and tools. This involvement is integral to the expansion of Azure across all Azure cloud data centers. The collaborative nature of this work extends to various Azure teams, providing exposure to critical components such as Identity, Cosmos DB, Core, Compute, Network, Storage, among others. This initiative aligns seamlessly with the company's unwavering commitment to advancing technology and innovation, playing a pivotal role in shaping the digital landscape and catering to the diverse needs of Azure's expansive cloud infrastructure.

Responsibilities

- Write highly efficient and clean code capable of processing large volumes of transactions with low latency and high reliability.
- Analyze, design, develop, implement, and maintain application code for complex software using .NET, ASP.NET MVC, APIs, XML, RESTful.
- Ensure high unit test coverage and integrate telemetry for backend monitoring in the code.

- Collaborate as a member of the engineering team to build software solutions aligned with the Product Owner's vision.
- Deliver high-quality, maintainable, and secure software solutions.

Requirements

- Over 4 years of experience in software design and development, utilizing C#, ASP.NET MVC.
- Skilled in developing large-scale web applications within the .NET framework.
- Proficient experience in developing SaaS applications using Microsoft Azure technology.
- Strong communication skills, able to convey complex information to both technical and non-technical stakeholders.
- Take ownership of and resolve technical issues, questions, and hurdles faced by the development team that hinder progress.
- Proficient in conducting effective code reviews to ensure the highest code quality.
- Demonstrate deep technical expertise in designing solutions, developing code, and resolving issues.

Must have skills

- Proficiency in: C#, ASP.NET MVC, APIs, RESTful.
- Experience with SQL
- Experience in working with Azure on the following tech: Azure API Management, Azure Storage, Cosmos DB, API Management, App Service.
- Knowledge of design patterns.

Nice to have skills

- Experience with Python language
- Experience in scaling up Azure regions, deploying applications in Azure, and familiarity with Azure Key Vault, Azure SQL, Storage, and Application Insights.
- Demonstrated experience in CI/CD tools and methodologies, with a strong proficiency in Git and Azure Pipelines.
- Familiarity with Azure Monitor.

Our benefits

- Paid vacation, sick leave
- Official state holidays
- Professional growth while attending challenging projects and the possibility to switch your role, master new technologies and skills with company support
- Flexible working schedule: 8 hours per day, 40 hours per week
- Personal Career Development Plan (CDP)
- Employee support program (Discount, Care, Heals, Legal compensation)
- Paid external training, conferences, and professional certification that meets the company's business goals
- Internal workshops & seminars
- Possibility of relocation to the USA

Please send your resume/questions to our mail (career@akvelon.com).

We will be glad to see you on our team!
