Dear Teacher: السلام عليكم

Please watch the Teacher Training videos and sign-up for the teacher training and certification process.

If you are teaching my books (وفّقك الله), here are some helpful tips and advice to make you a more successful teacher.

How to Prepare to Deliver Lessons

a. Watch the video lesson
b. Complete the homework and check the answers using the Answer Keys.
c. Take the Quizzes/Tests yourself before asking the students to complete them. There are several wisdoms in this. If there is a confusing question, you will be the first to know and you can subsequently clarify it ahead of time. If the link is not working, you would know ahead of time and let me know. If there's a misworded question, you can let me know and I can fix it asap before students see it. By taking the quiz/test, you will also get an accurate picture of the level of difficulty. Sometimes, even teachers may get something wrong on the Quiz/Test; no worries. The Quiz will ensure your knowledge and skills are up to date and make you a more effective teacher. So, always, please take the Quiz/Test before the students do.

Stick to the Order of the Lessons!

The time-tested ordering of the lessons and chapters is designed for the best learning experience. Please do not change the order of the chapters/lessons in the textbooks.

Monitoring Student Progress

Carefully monitor the student performance on the Quizzes. It is one

of the best indicators of student performance and success. If too many students do badly on a given quiz/test, then you should review the lesson. If everyone misses a particular question, then you need to review it in the class.

Earning Certificate of Completion

To get the Certificate of Completion for a given textbook, the student must pass the Final Test with a minimum score of 75%. The questions on the Final Test are not new, trick questions, or surprises. They're taken from the Quizzes/tests and are therefore exactly the same as the ones on the quizzes and review tests they have already taken. To receive official Certificates, send the student names to QuranicLinguistics@Gmailcom

On Use of Grammar/Technical Terms Too Early

As you teach this book, please avoid using technical grammar terms too early before they're officially introduced. Using grammar terms prematurely can cause confusion, slow down learning, and increase dropout rates. All relevant and applicable grammar terms will be gradually introduced throughout this series as well as in the Quranic Linguistics series, in sha Allah. Don't get ahead of yourself 🙂 I love grammar terms (and even have dreams sometimes), and they will be slowly introduced at the right time. Please only use terms that are introduced in the lesson.

- nouns, verbs, particles, mubtada, khabar, maf'ul bihi, mudaf, mudaf ilayhi, etc.
- raf'/marfu', nasb/mansub, jarr/majrur, jazm/majzum
- sound masculine plurals, sound feminine plurals, broken plurals, etc.,
- If a student asks a question that's outside of the scope of the lesson, you can tell them to wait till it's properly introduced. Or you can do a one-to-one after the class.

Continued on the next page.

Saving Quiz Results

Please advise your students to do the following after taking a quiz/test: Save and print their scores and answers immediately after taking the quiz/test. Save the emails that contain scores and results. Due to the large volume of students and space limitations, quiz/test data is not preserved. The student is responsible for making sure that the quiz score and result is not deleted from their inbox.

جزاك الله خيرا ووفّقك الله!

Ustadh Qazi
