

Summer Reading Assignment for Macro Economics Students:

Title: "Freakonomics: A Rogue Economist Explores the Hidden Side of Everything" by Steven D. Levitt and Stephen J. Dubner

Description:

As part of your summer enrichment, you are encouraged to read "Freakonomics" by Steven D. Levitt and Stephen J. Dubner. This provocative book takes a unique approach to economics, exploring unexpected connections between seemingly unrelated phenomena and shedding light on the hidden forces shaping our world.

Assignment:

1. Read "Freakonomics" over the summer break.
2. While reading, take notes on key economic principles, theories, and case studies presented by the authors.
3. Next, you will outline the chapter using the "ESPNW" Please see example below
4. Write a reflective essay (500-700 words) analyzing the economic concepts discussed in the book and their real-world applications. Consider how the insights gained from "Freakonomics" can deepen your understanding of macroeconomics.
5. Submit your essay to your Macro Economics teacher by the first week of the new school year for extra credit.

Additional Resources:

- You may find supplementary articles, podcasts, or TED Talks related to the topics covered in "Freakonomics" to enhance your comprehension.
- Feel free to engage in discussions with classmates or seek guidance from your teacher if you encounter any challenging concepts.

Enjoy your summer reading journey and happy exploring
