

Hello everyone,

My name is Mr. Olson and I'll be your science teacher. I'm extremely excited to kick off my 4th year of teaching and can't wait to get to know you all. Subjects I have taught in the past are physical science, social studies, and spanish. In my spare time I enjoy being active and spending time outdoors.

This year we will be studying how all forms of life interact and impact each other. These topics will include cells, energy, genetics, evolution, and ecology.
