

GRADUATE SCHOOL

S.1. There is a system of implementation, monitoring, evaluation and utilization of research outputs.

**Master of Science in
Animal Science**

S.1. There is a system of implementation, monitoring, evaluation and utilization of research outputs.

The University of Southern Mindanao (USM) has mechanisms in place that require faculty and students to conduct research and enable proper implementation of researches. The university has the organization structure for research and development as shown in the figure below. Incentives are in place to sustain the quality of outputs generated from research. USM has monitoring and evaluation schemes that ensure high quality of research outputs. The knowledge and technologies generated from research are disseminated to target clientele. The intellectual properties resulting from faculty and student researches are protected.
