Thank you so much for this new, updated policy that reflects current language, acknowledges the best reviewing sources and selection criteria, and recommends best practices in collection development in general. The new policy clearly outlines goals and processes for creating collections that represent and extend the diverse recreational reading and information needs of our schools and students. It also clarifies the procedures for challenges and provides rationales for both weeding and the types of donated materials that should be accepted or rejected. The new Collection Development Policy is a critical guide for all school librarians and administrators, and I hope that it will be adopted.
