

Write a reflective blog post about your learning. When writing, think carefully about the audience who will be looking at your work.

## Google Maps Blog Post

**Google maps WALT:** Through finding out about volcanoes around the world to pin on a map, we are learning to make meaning of a range of texts by identifying main ideas in them and then translating the information and ideas that we learn into our own words.

Every time we post on our blogs, it is seen by a lot of people from around the world who want to follow our learning!

EVERY time we post a learning follow-up or creation to our blog, we should **write 2 paragraphs** which **explain our thinking, understanding, and learning** for this particular learning experience.

### Blog Post

#### Paragraph 1: **Explain the task**

- ★ What did you have to create?
- ★ Why did you have to create it? (WALT)
- ★ The process - how did you create it/ what tools did you use?

[3-4 sentences]

(go to next page for next paragraph)

### Paragraph 2: Explain what you learnt

- ★ Explain to your audience your new learning (link back to WALT).
- ★ What can someone learn from looking at your creation/ follow-up?
- ★ What did you enjoy about this learning experience?

[3-4 sentences]

## Instructions for uploading your map to your blog!

1. Follow these [instructions](#) to ensure you have completed the task for at least 15 volcanoes around the world (remember to use a google shortener to link us to your information).
2. Within your map you want to embed on your blog, click on the **three dots in a vertical line** to the right of 'Add layer.'
3. In the drop-down menu, click on **embed on my site**.
4. Copy this HTML code (Control-C)
5. Within your new blog post, ensure you are within '**HTML**' (not 'Compose').
6. Paste the HTML code where you want it to appear (before/ after your blog post).
7. When you click back to the '**Compose**' screen, your map should appear.
